Embedded Programming

Software

# Proposal

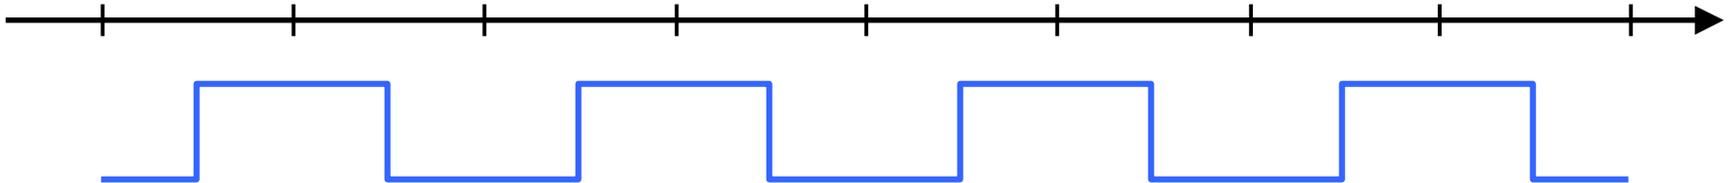

Environment

**Human:** Programming in terms of environment time

-----

**Compiler:** Implementation in terms of platform time

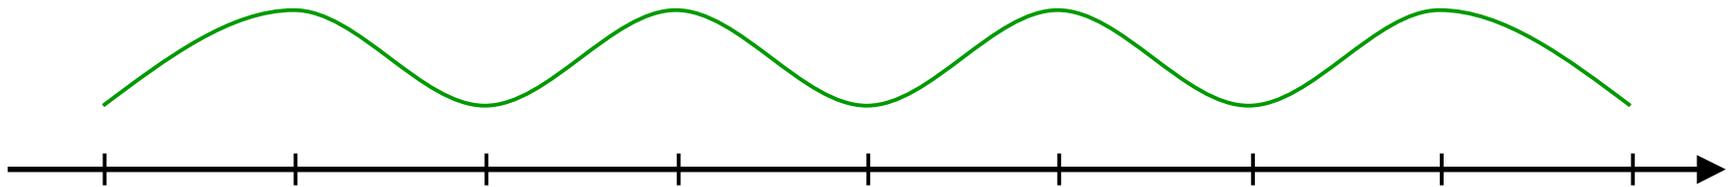

Software

# Platform Time is Platform Memory

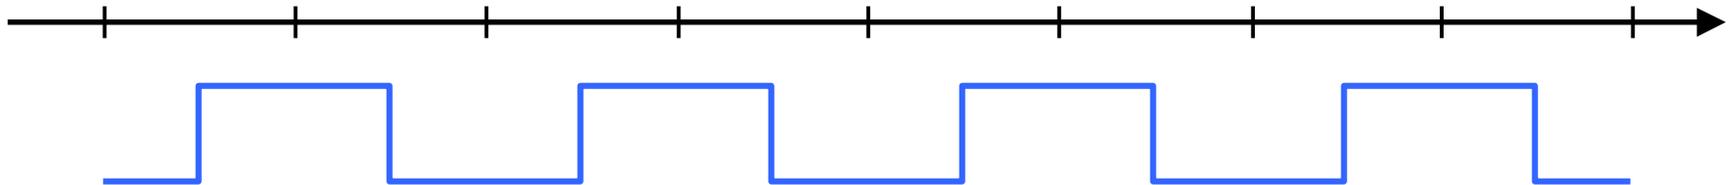

---

Environment

- Programming as if there is enough platform time

- 
- Implementation checks whether there is enough of it

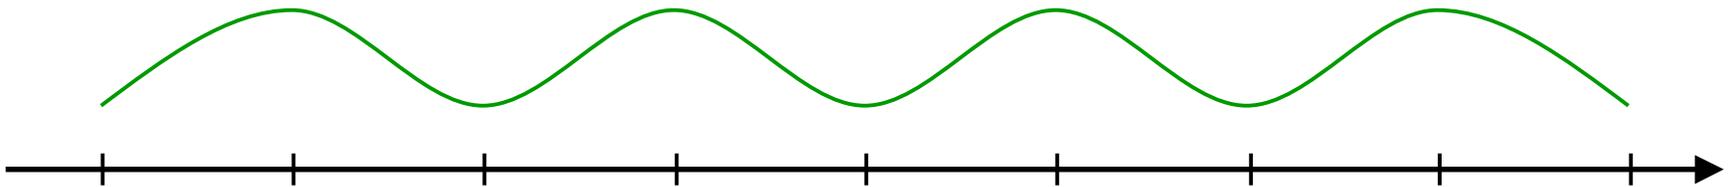

Software

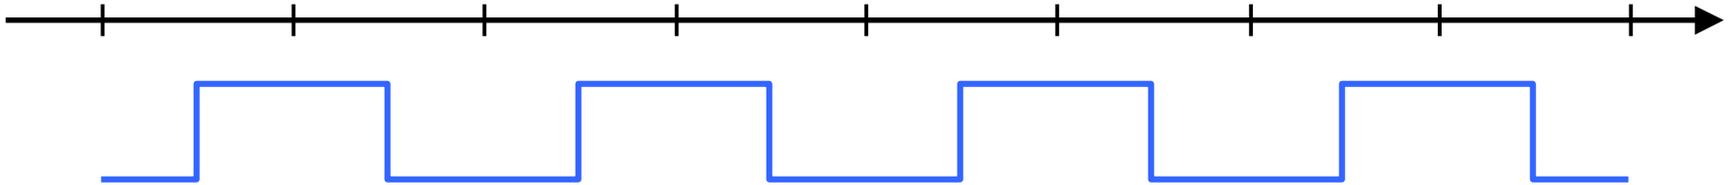

# Portability

---

Environment

- Programming in terms of environment time yields platform-independent code

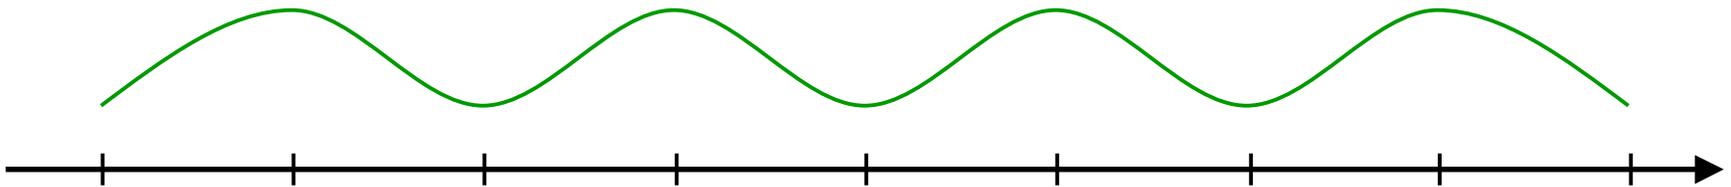

Software

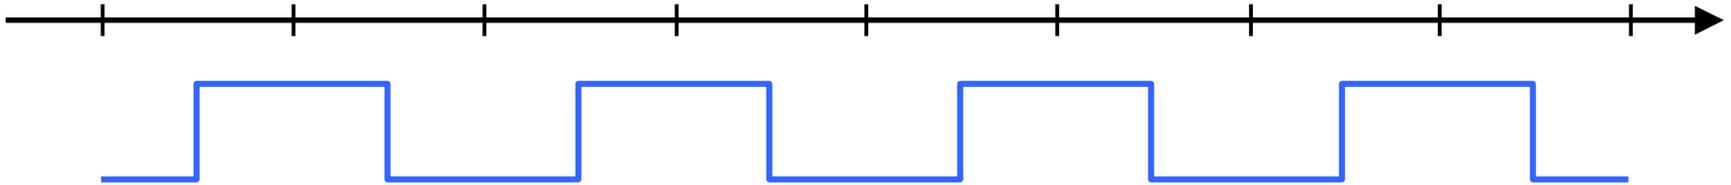

# Predictability

---

Environment

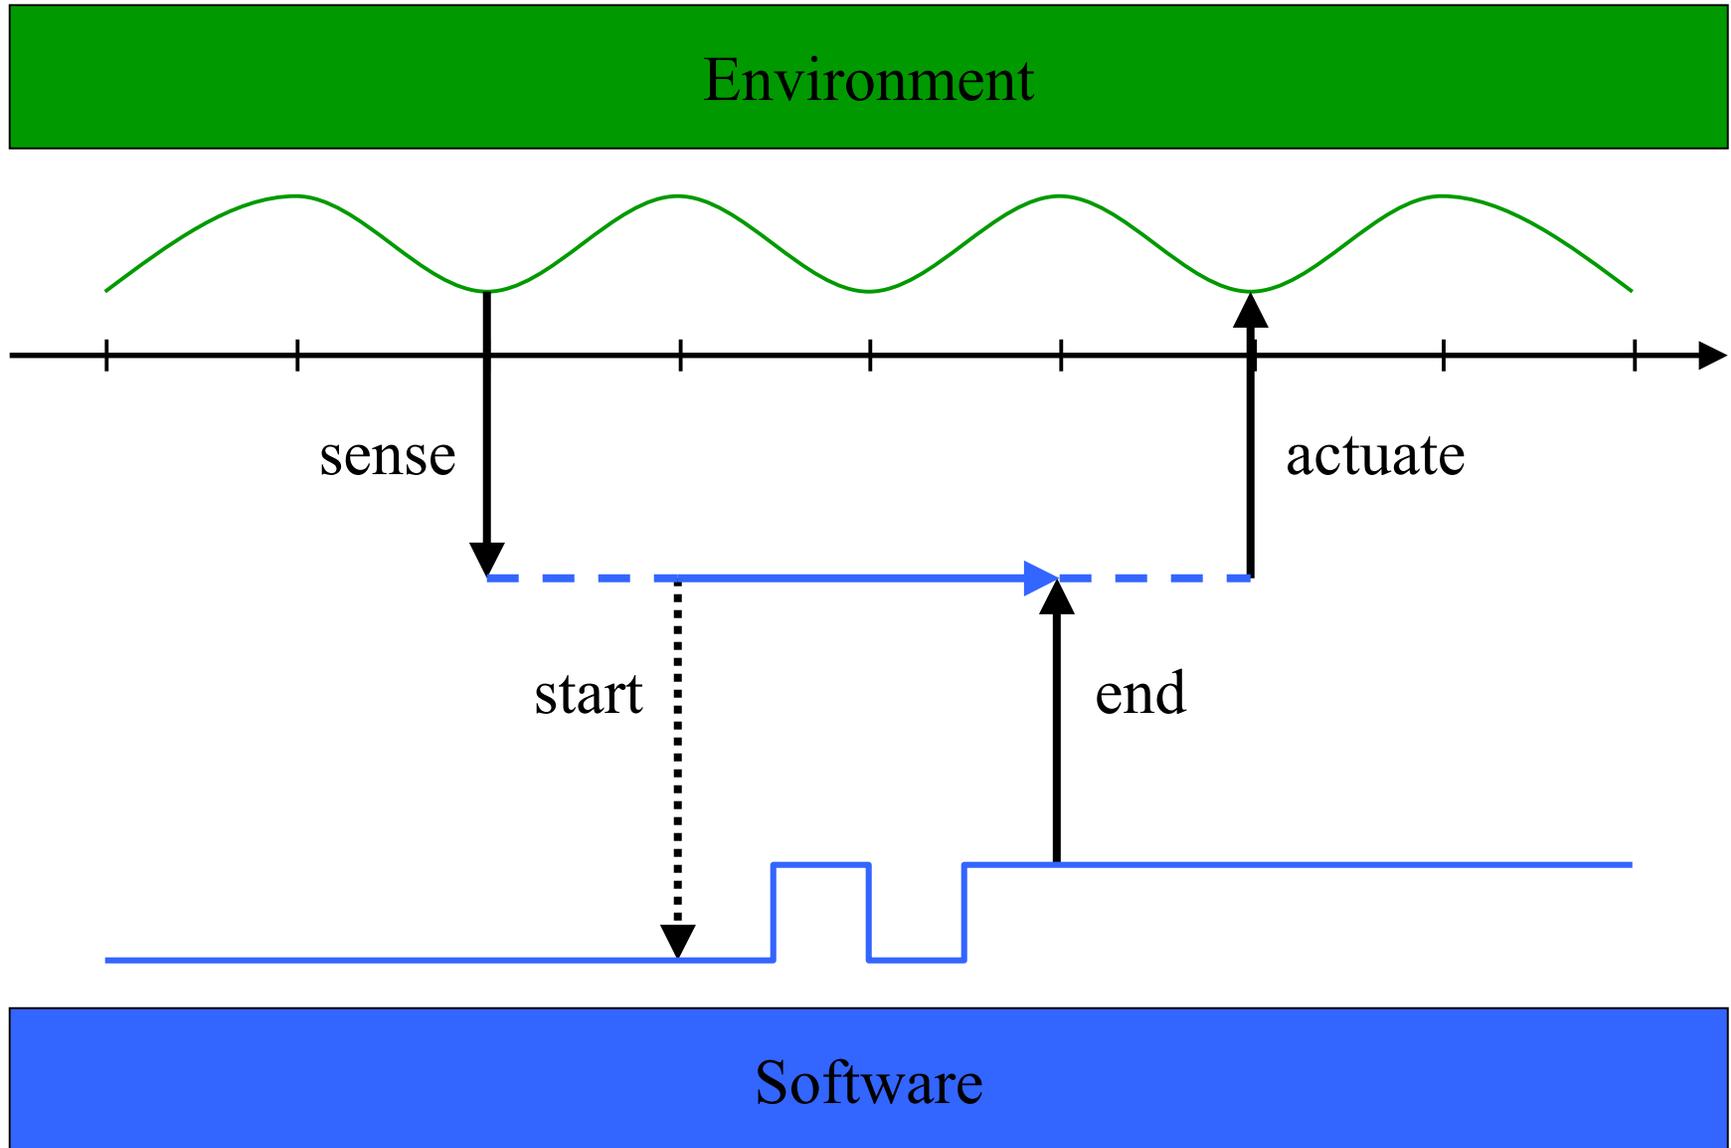

- Programming in terms of environment time yields deterministic code

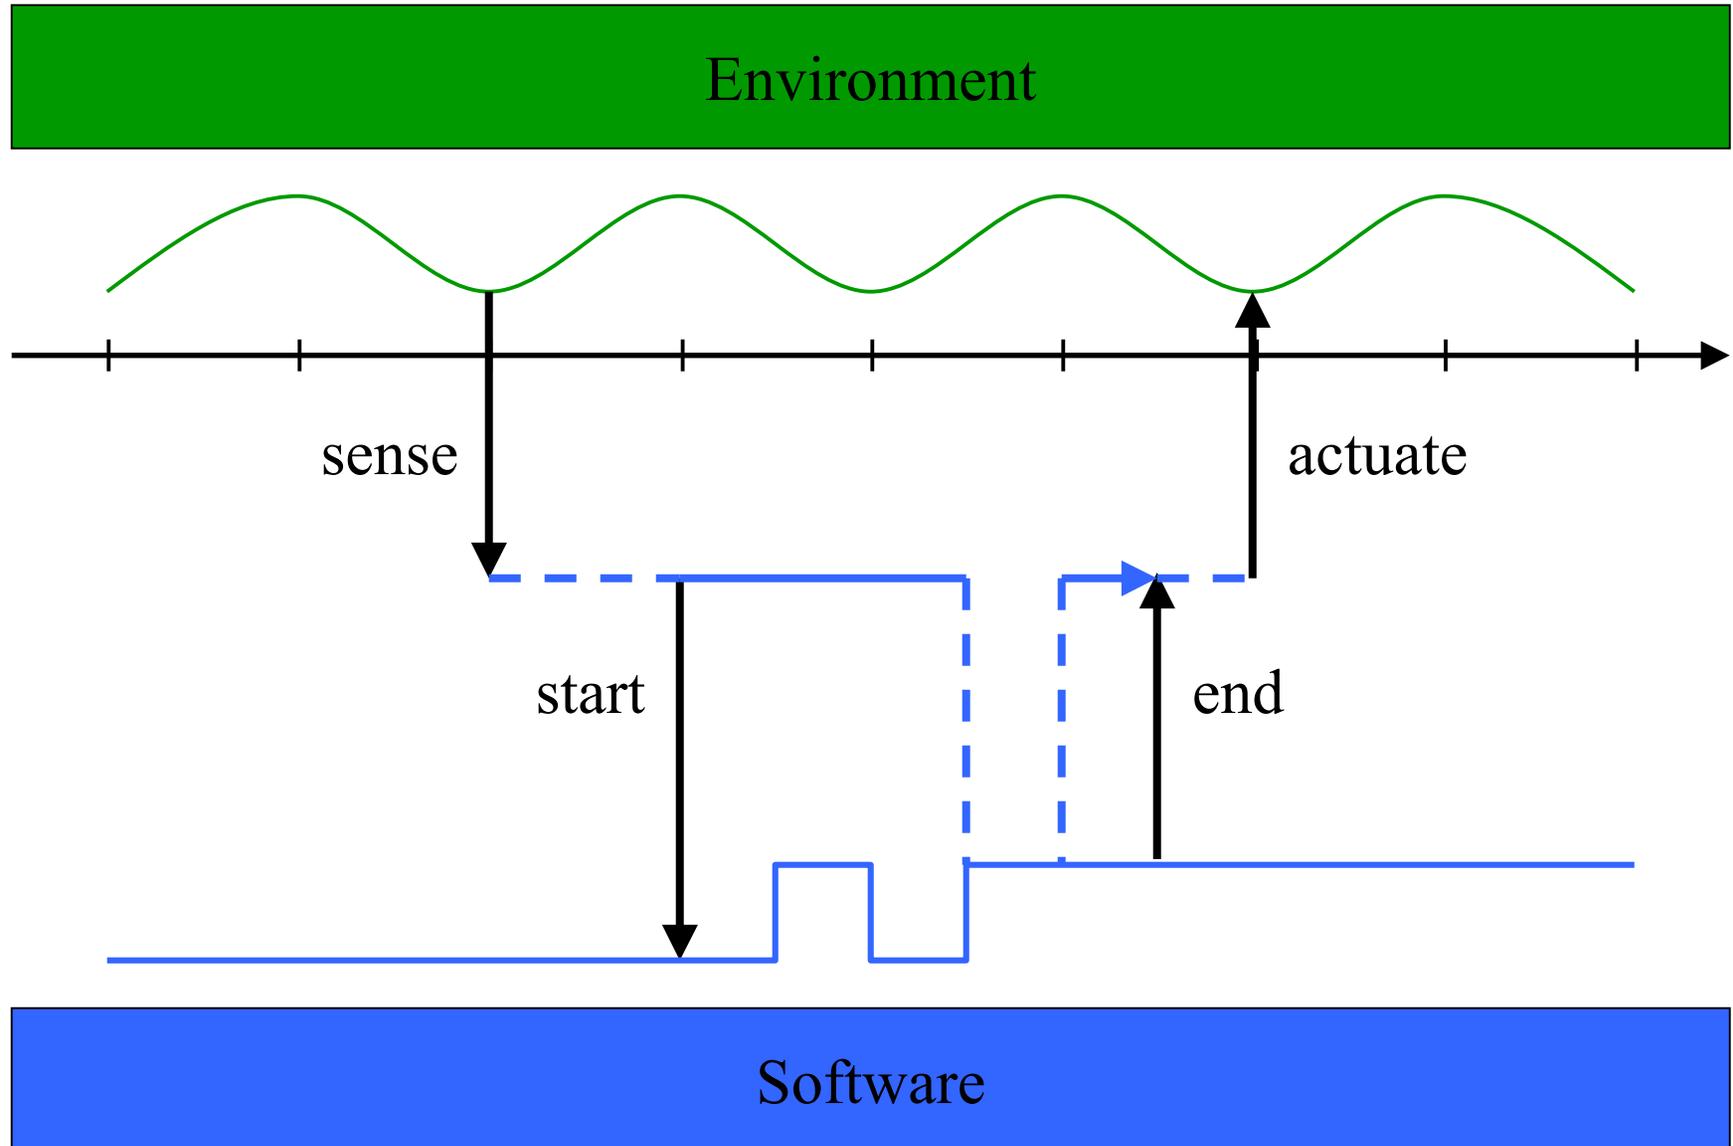

Software

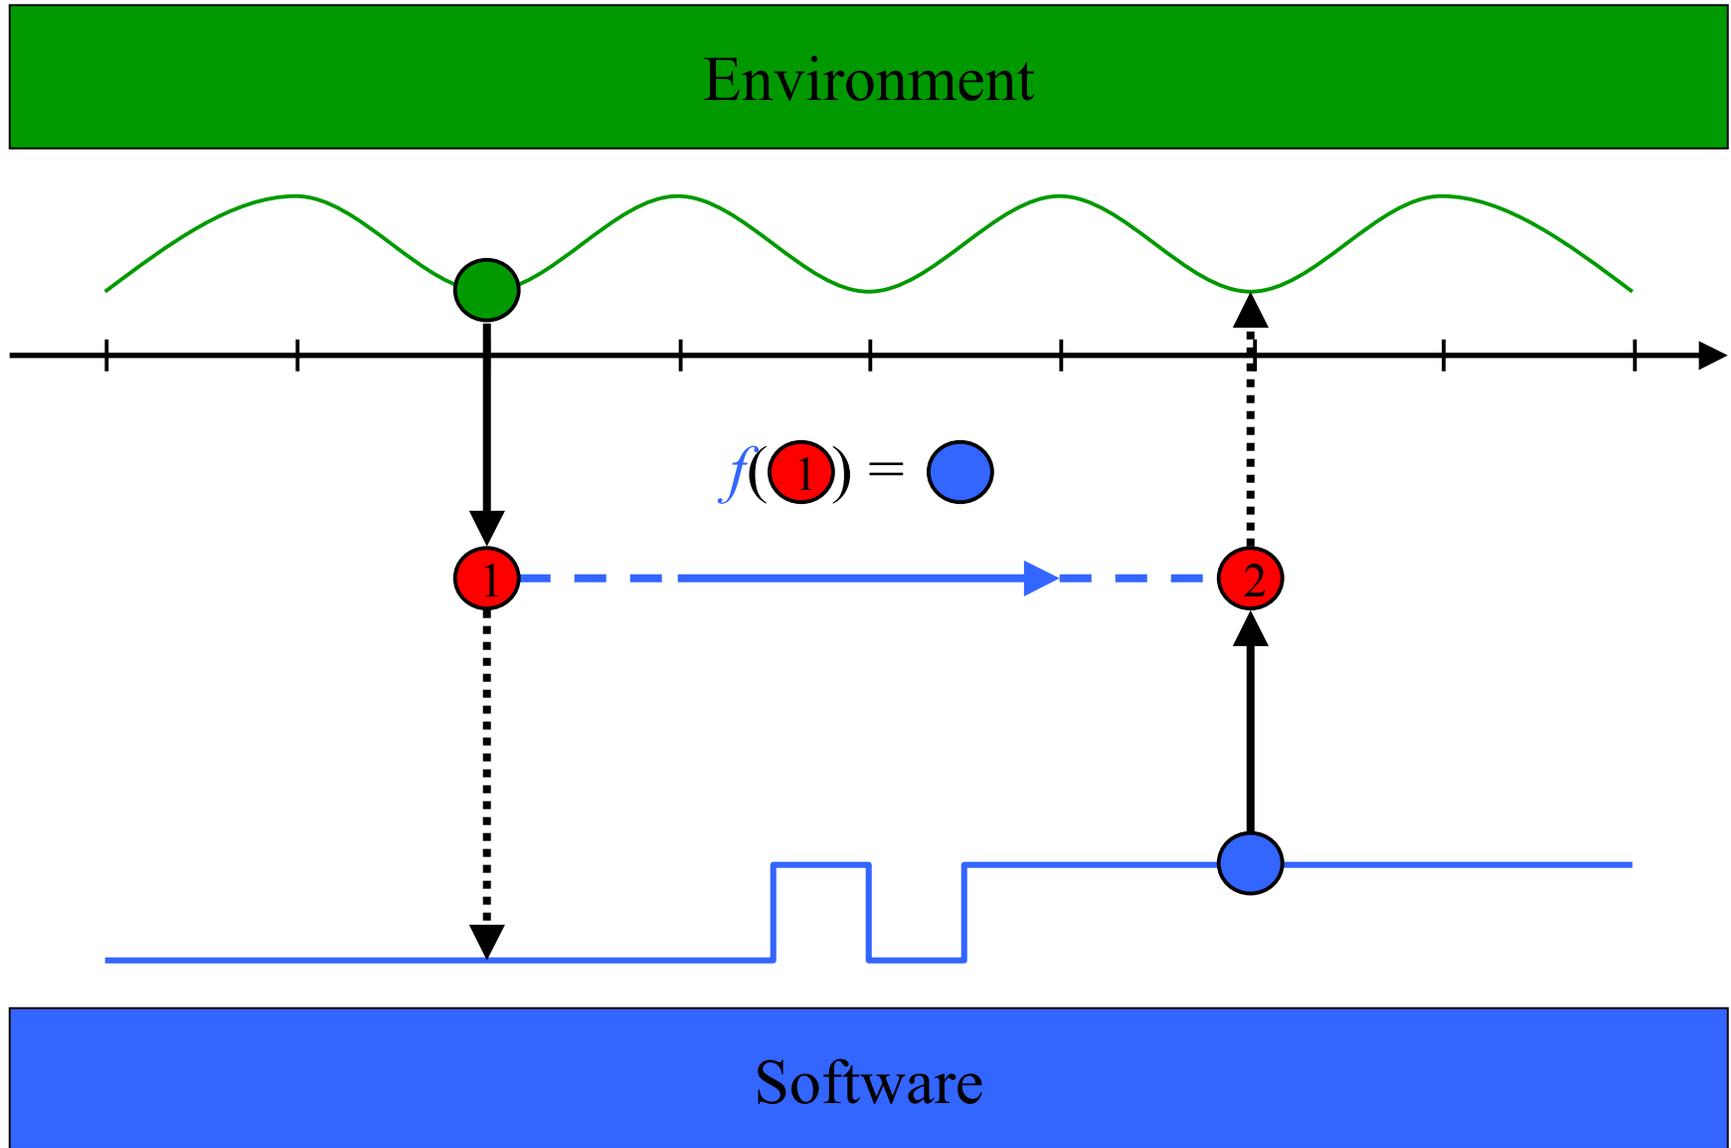

# The Task Model

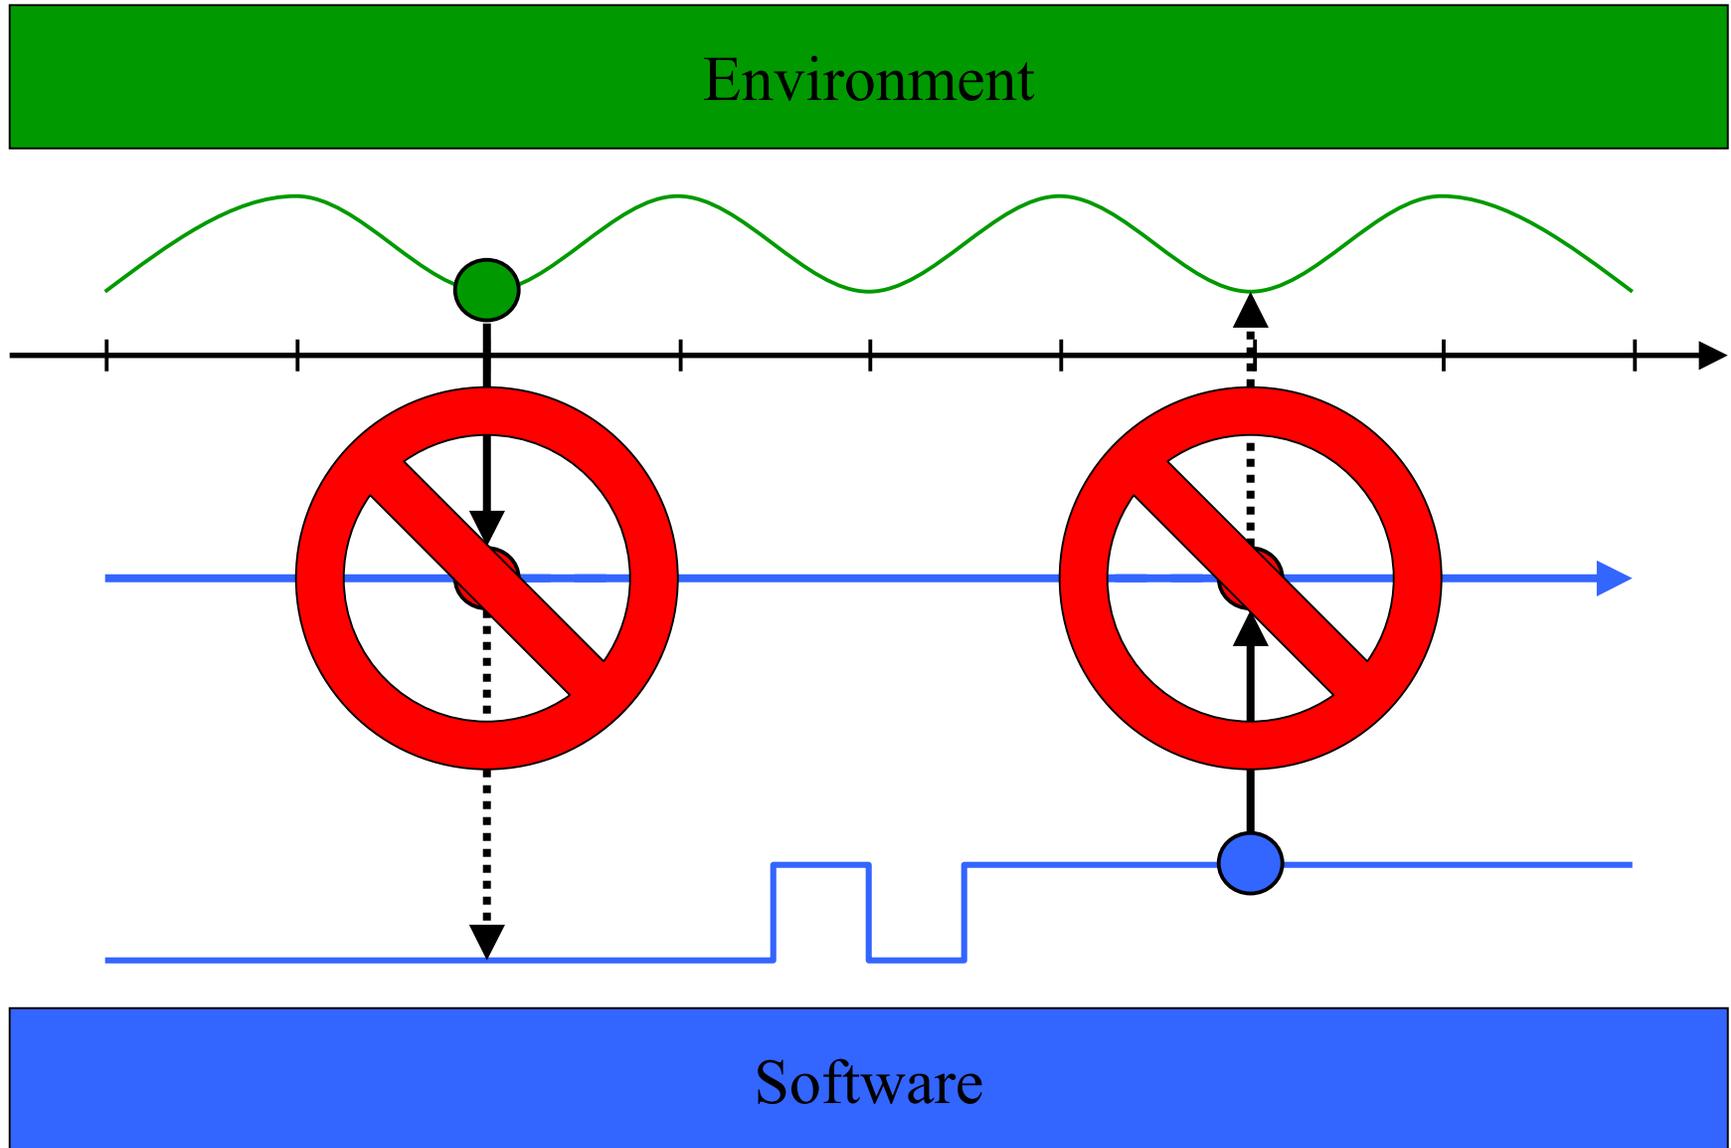

# Preemptable...

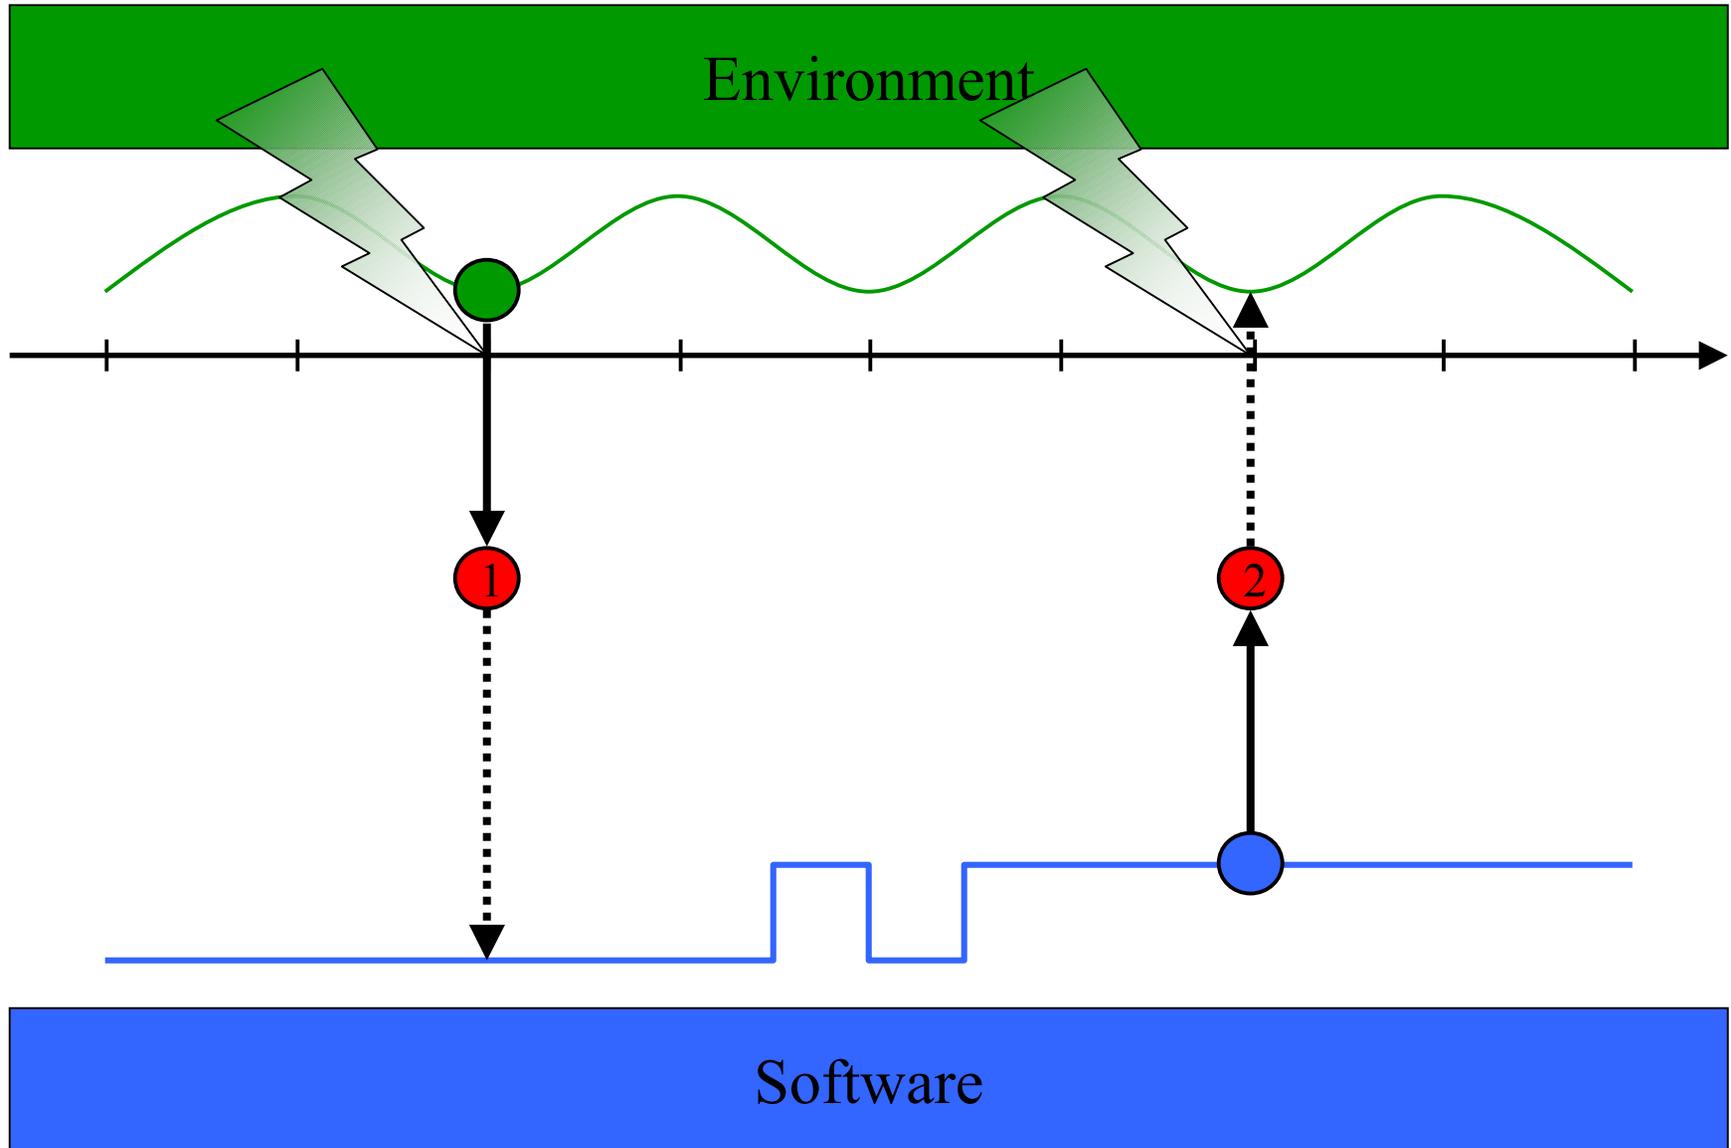

# ...but Atomic

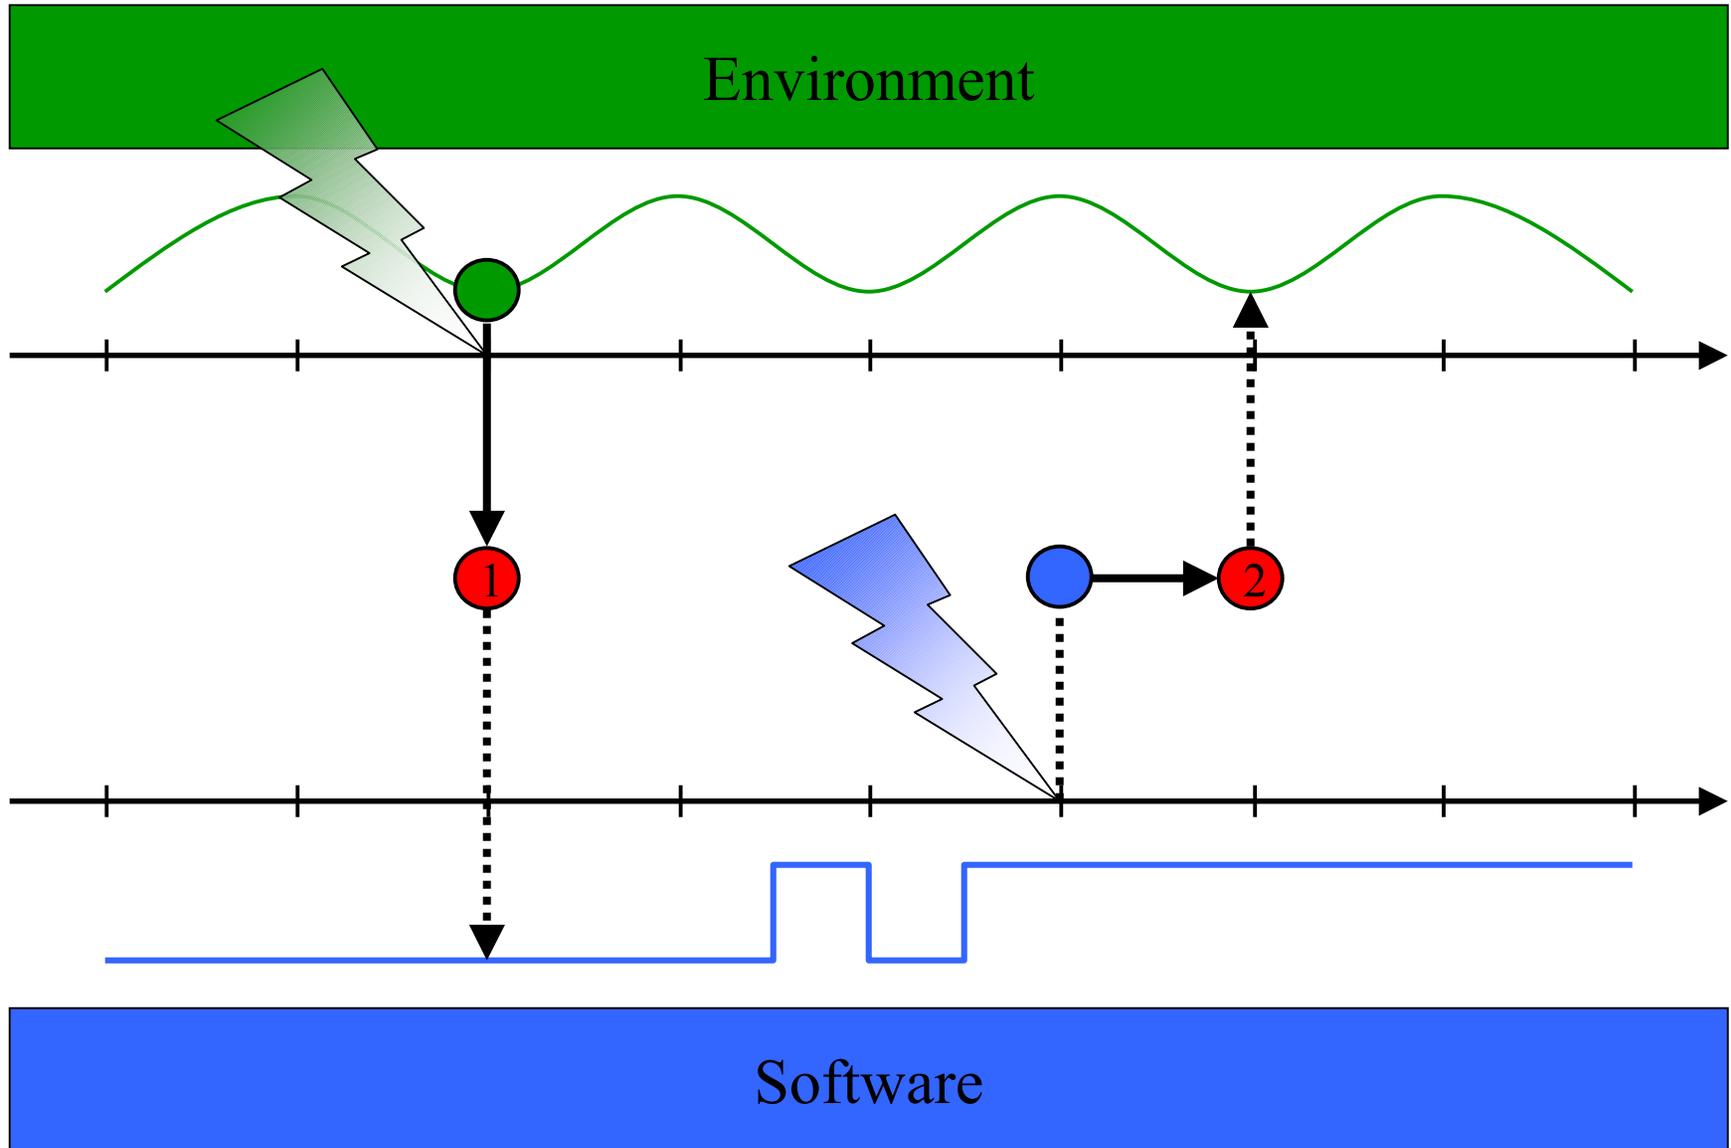

# Time Safety

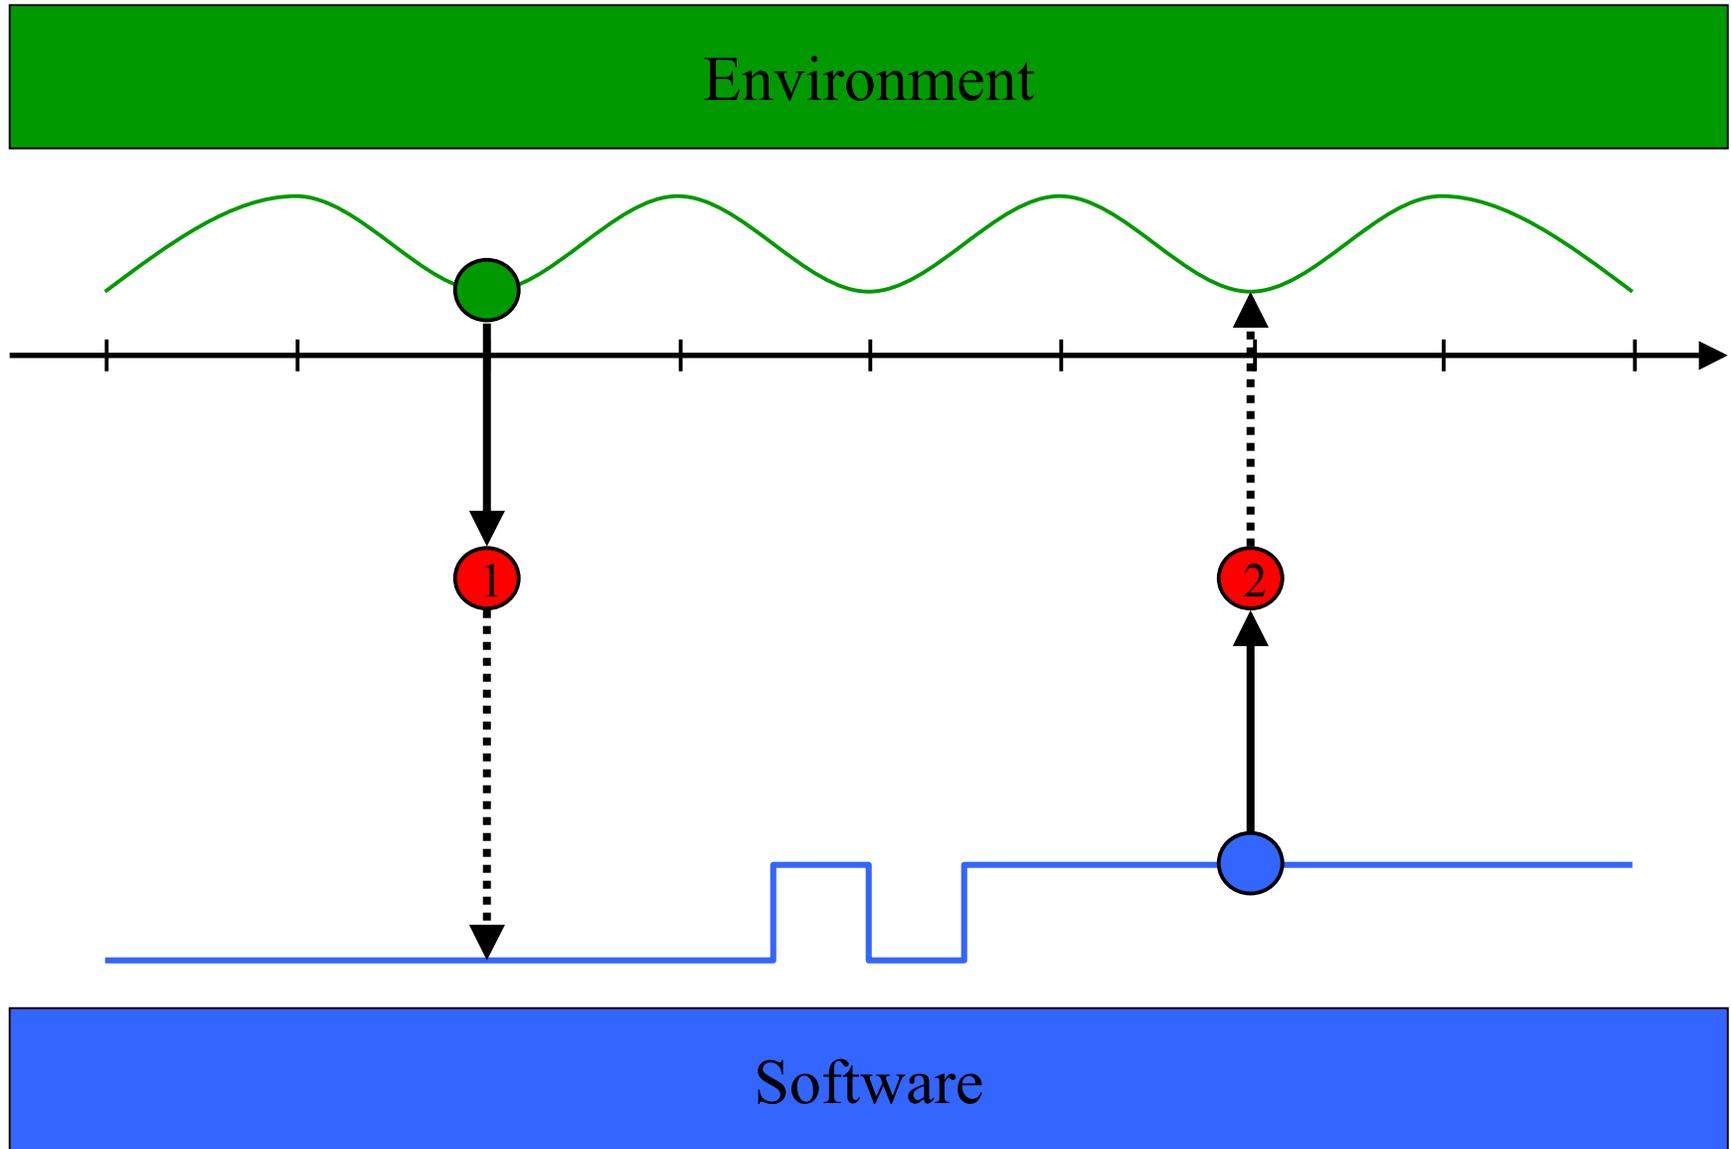

# Environment-triggered Code

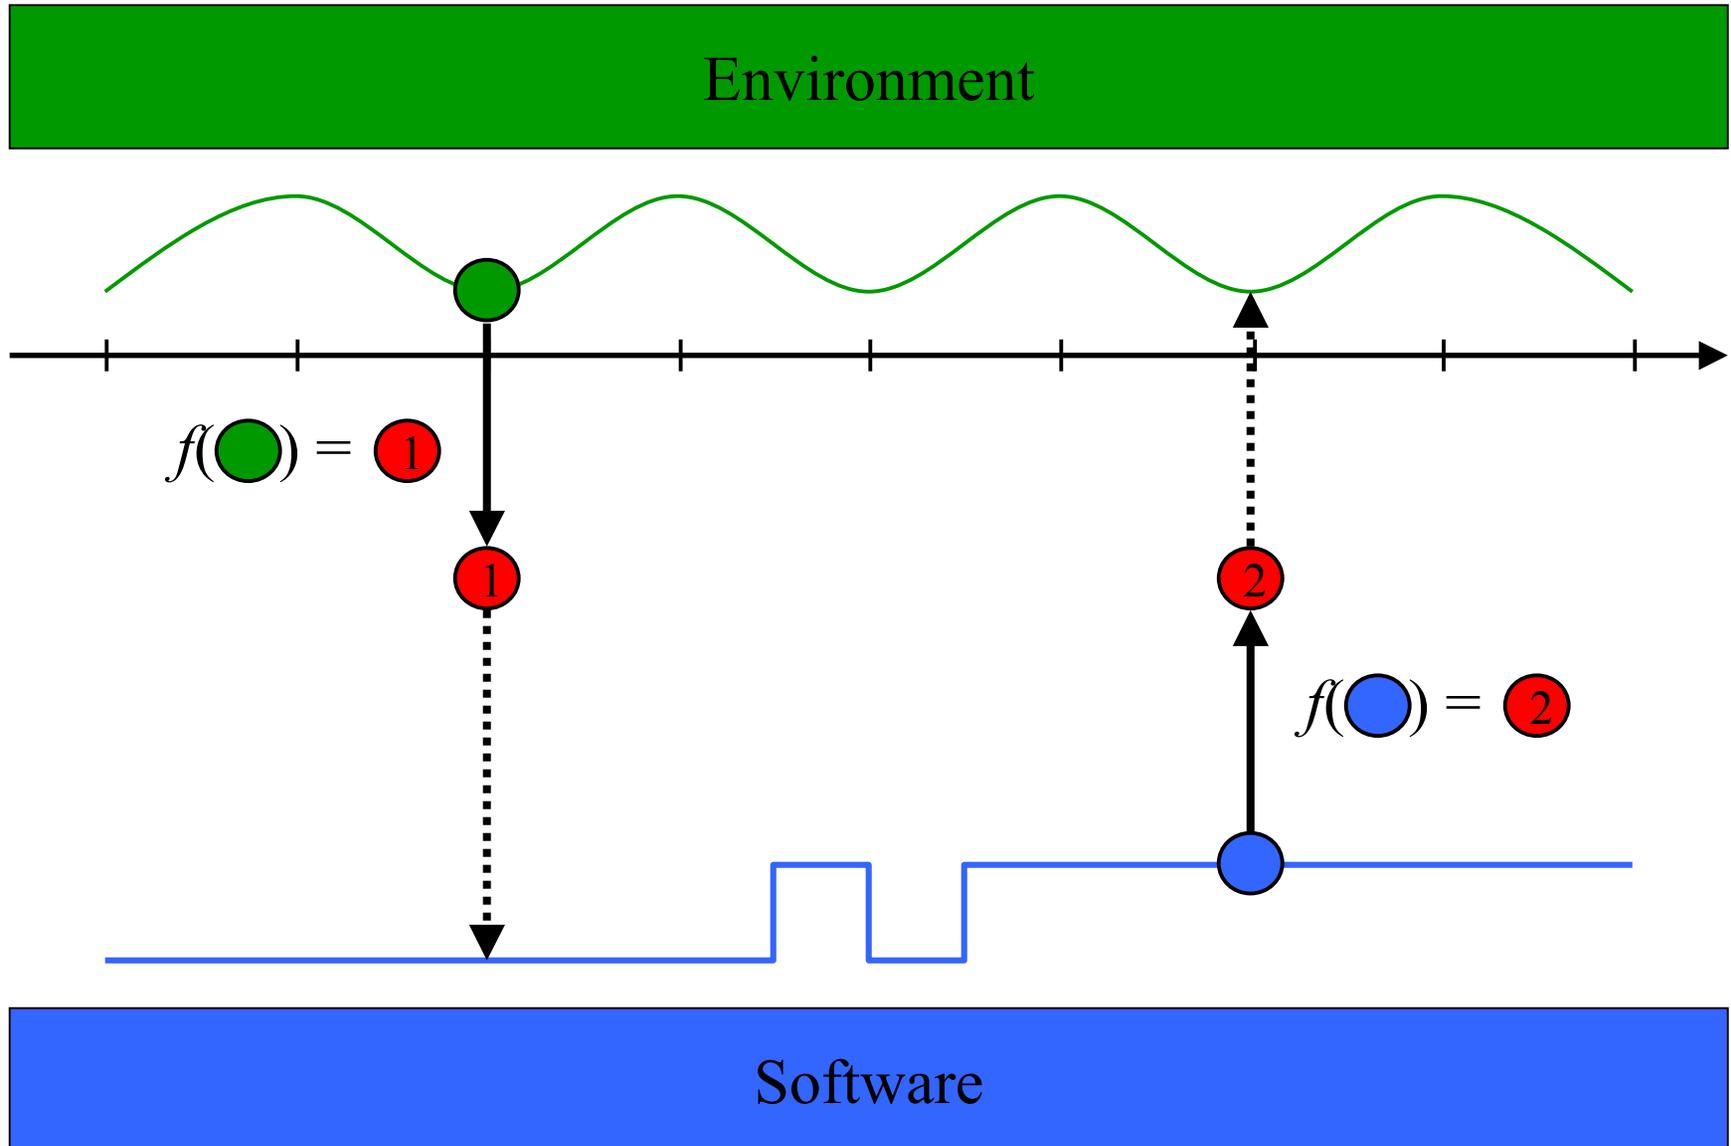

# Task-triggered Code

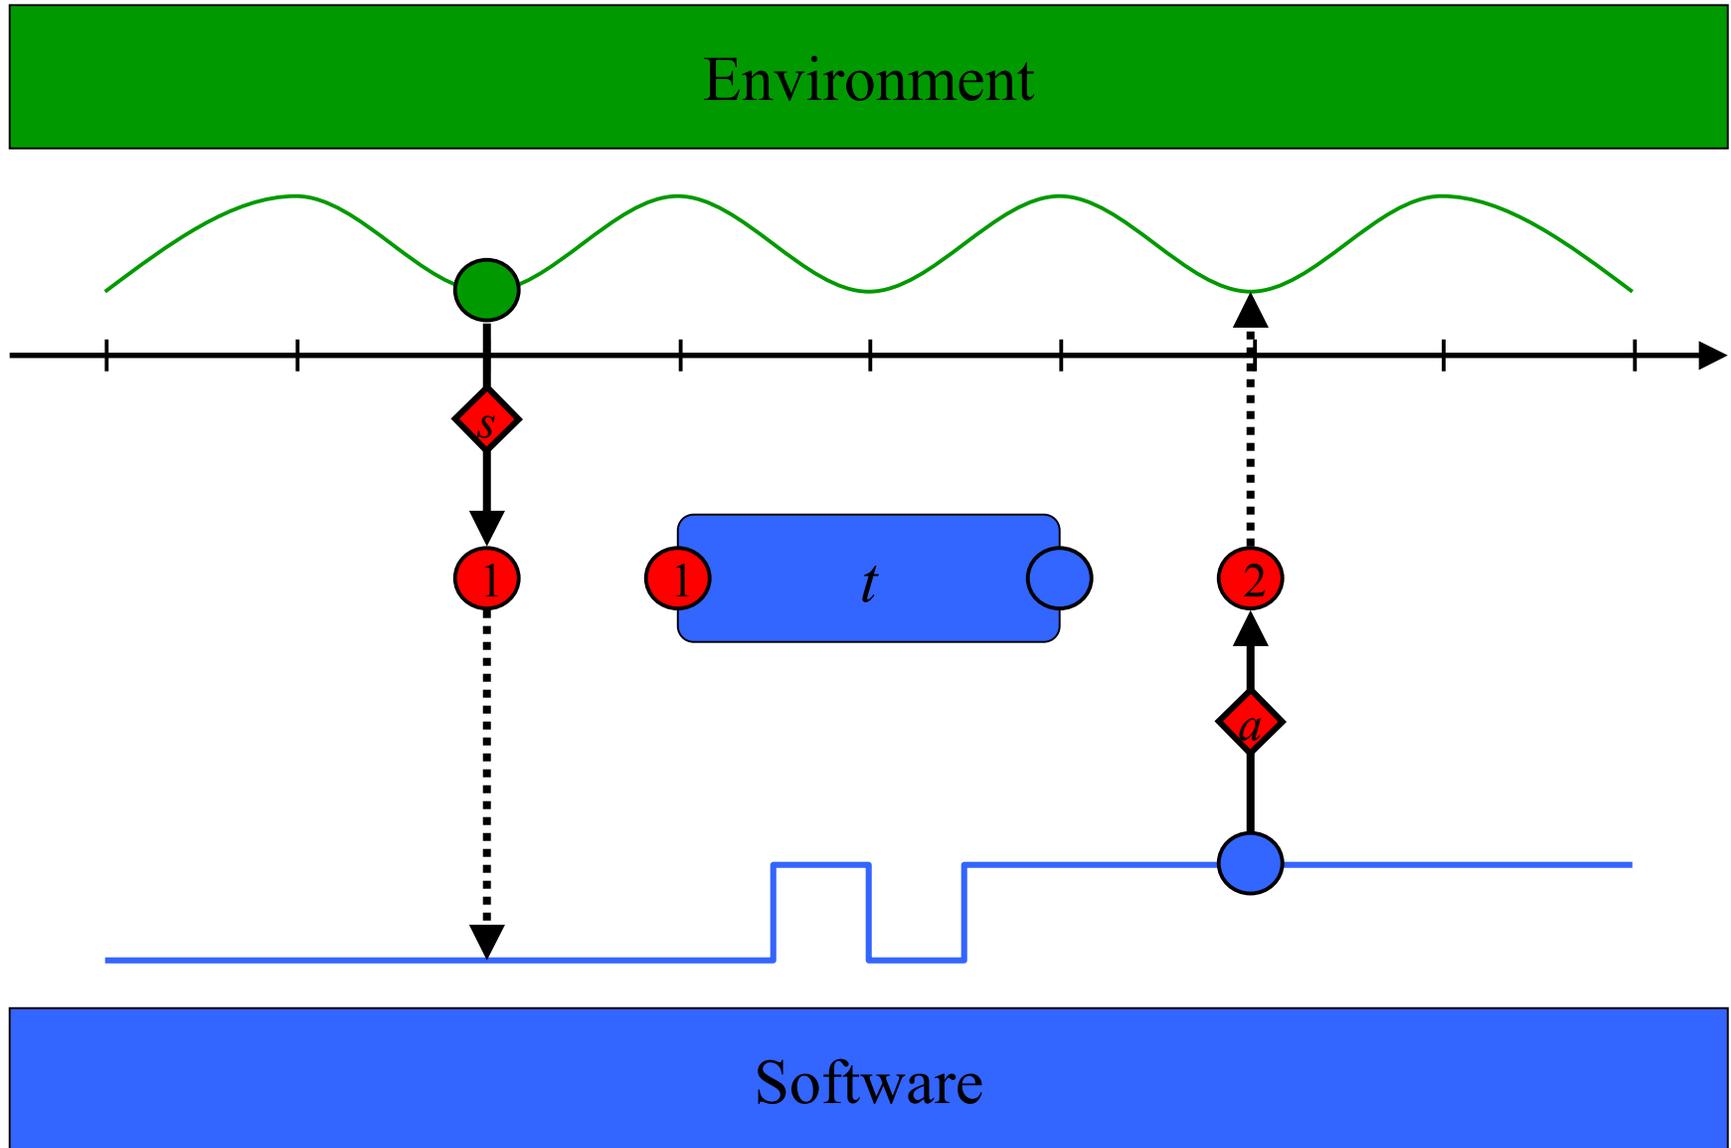

# The Driver Model

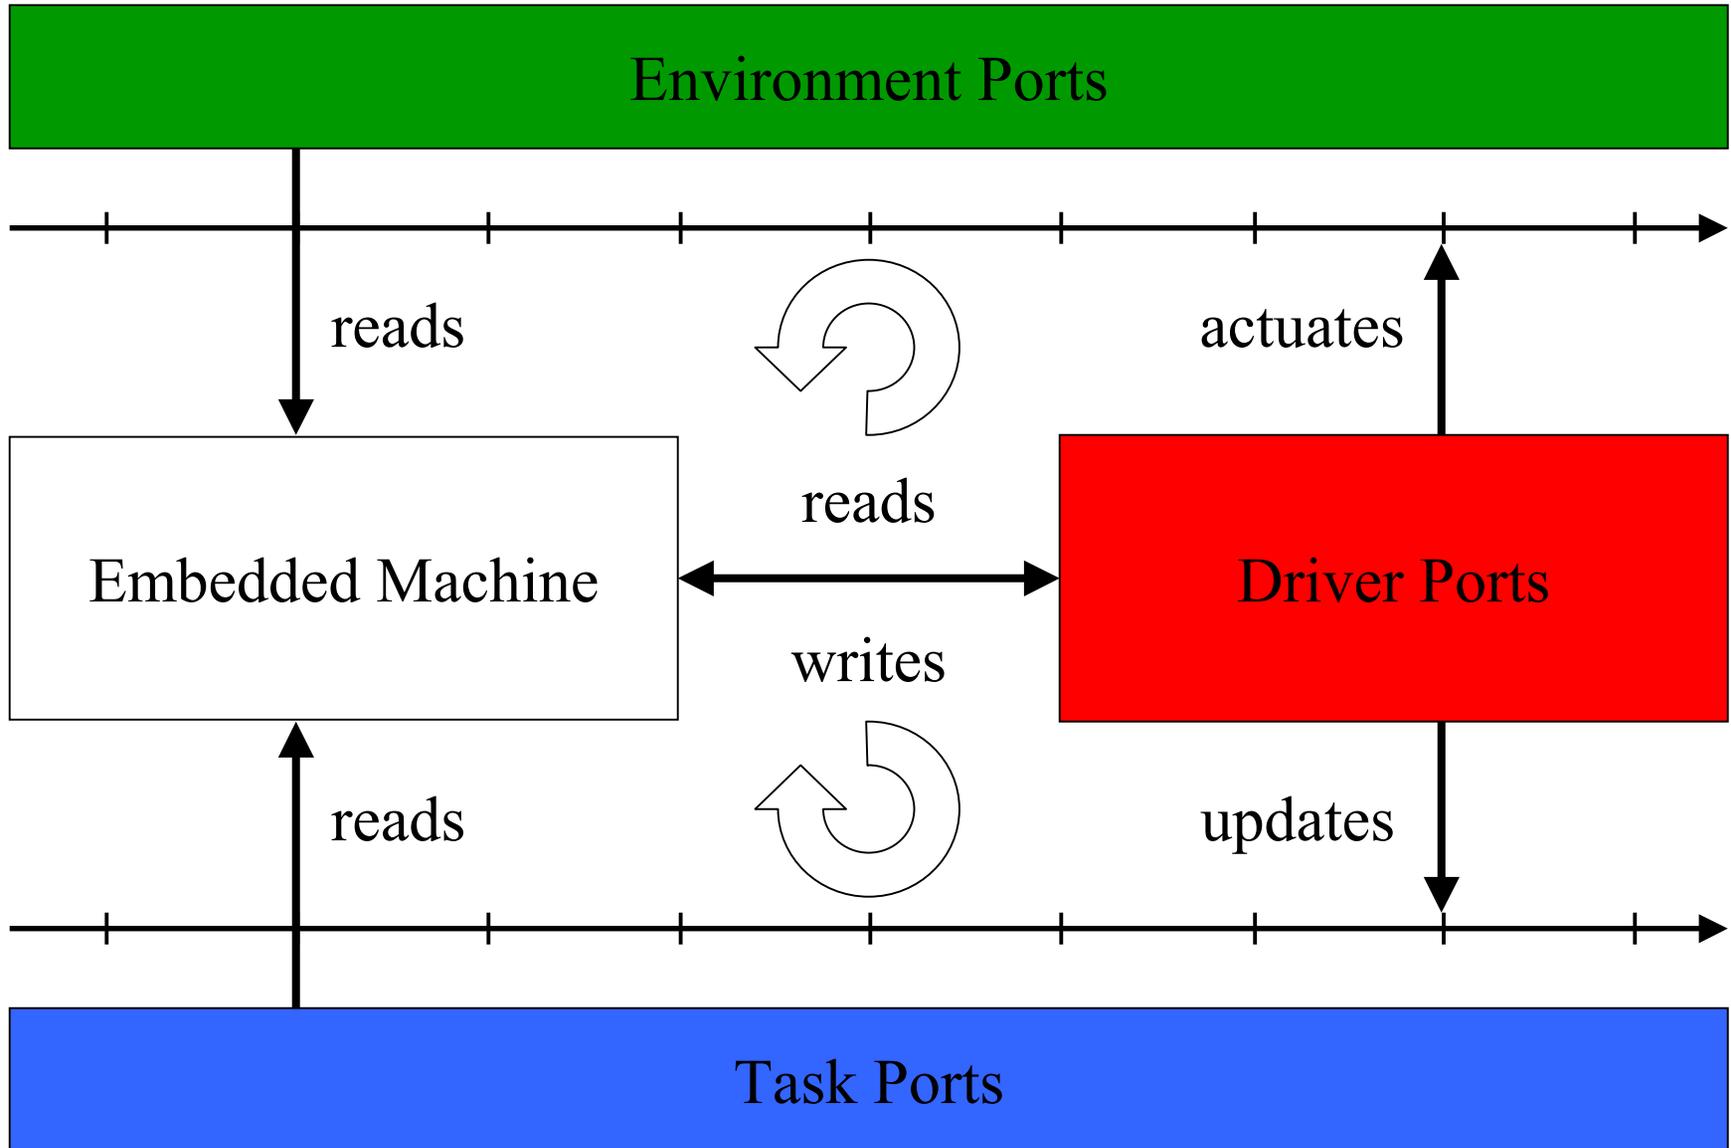

# Non-preemptable, Synchronous

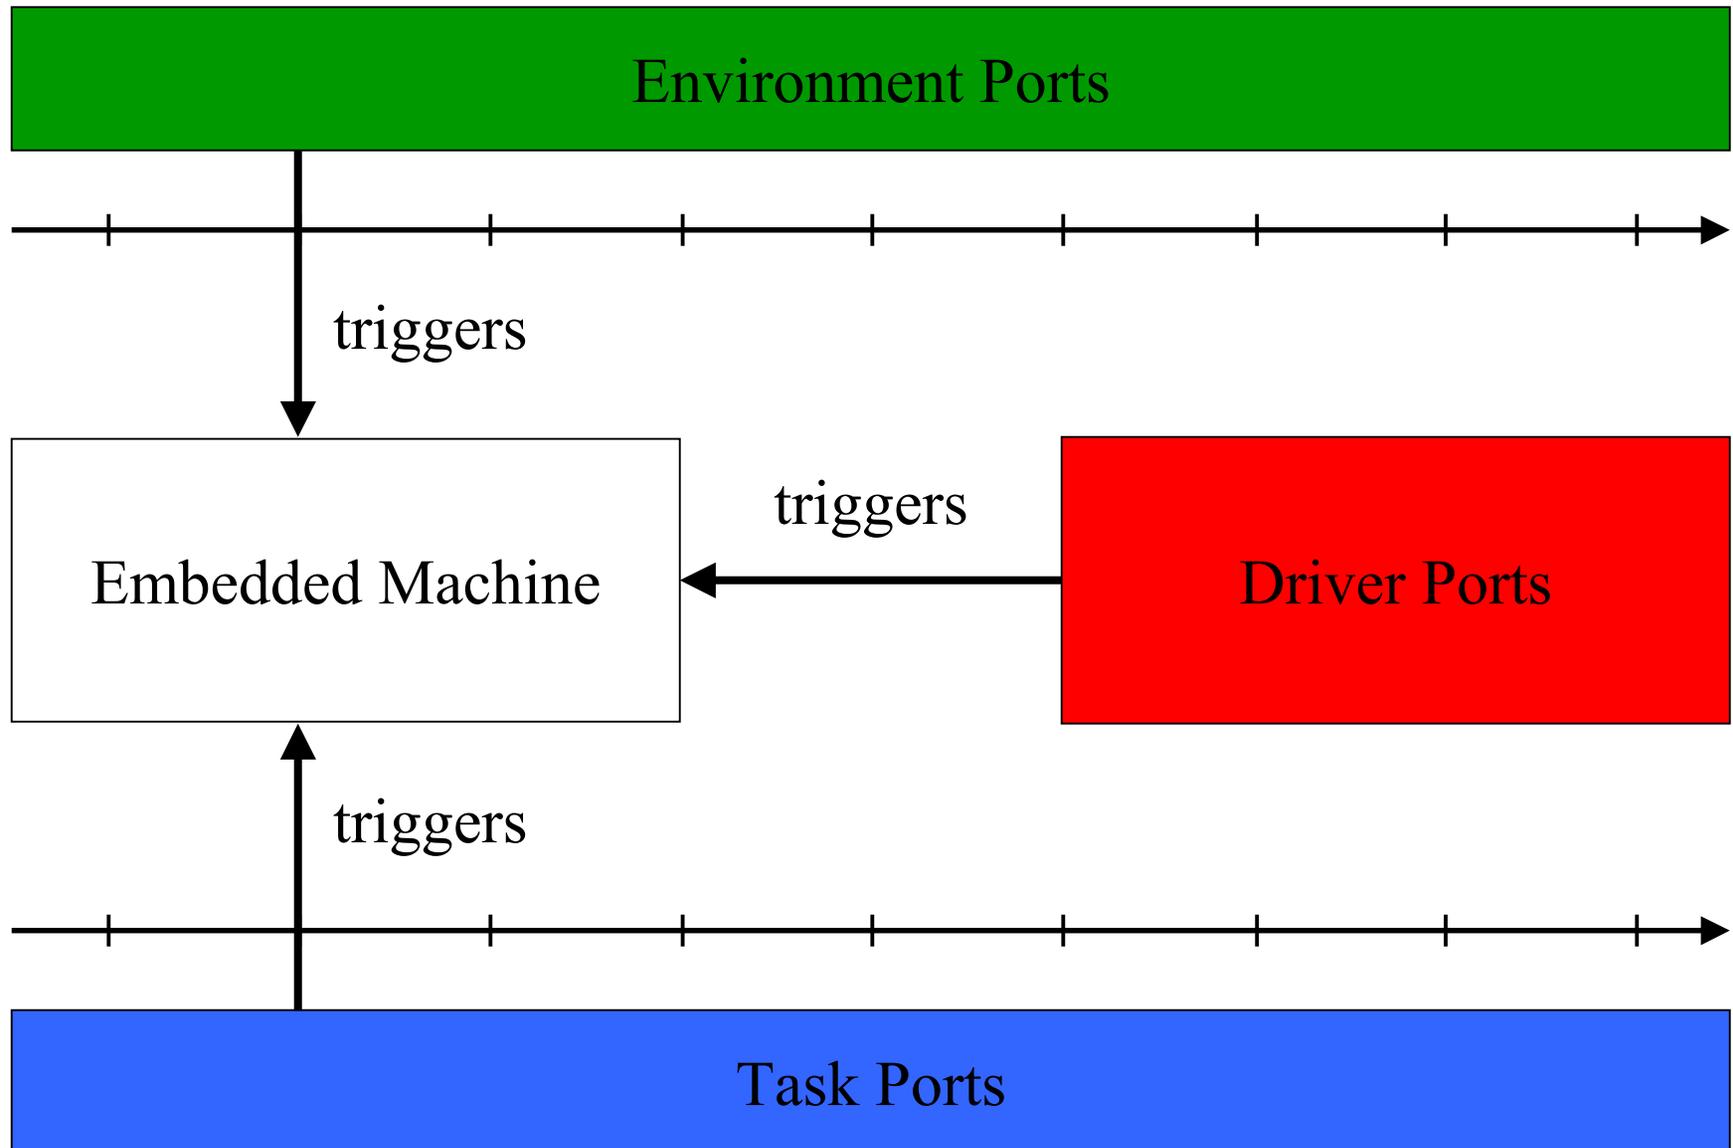

# Syntax

# The Embedded Machine

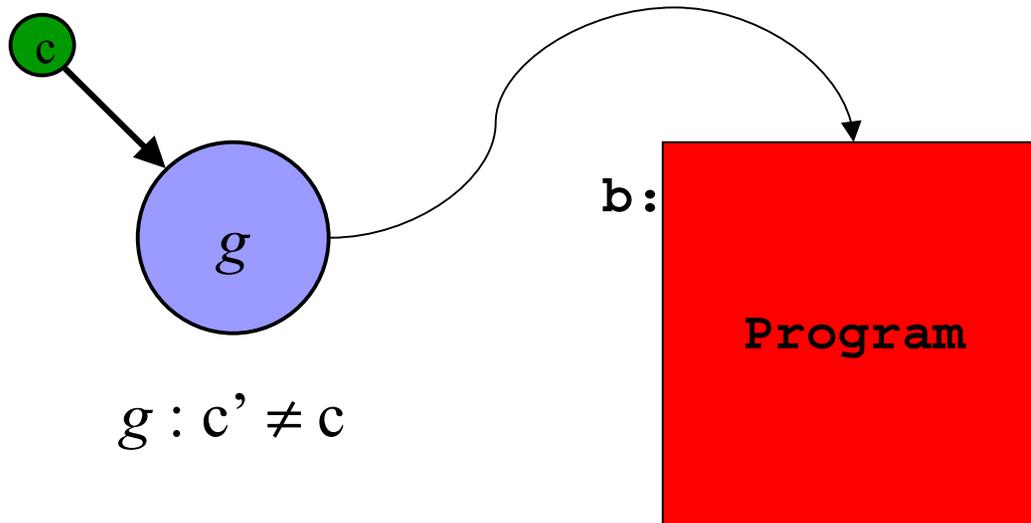

# The Trigger Model

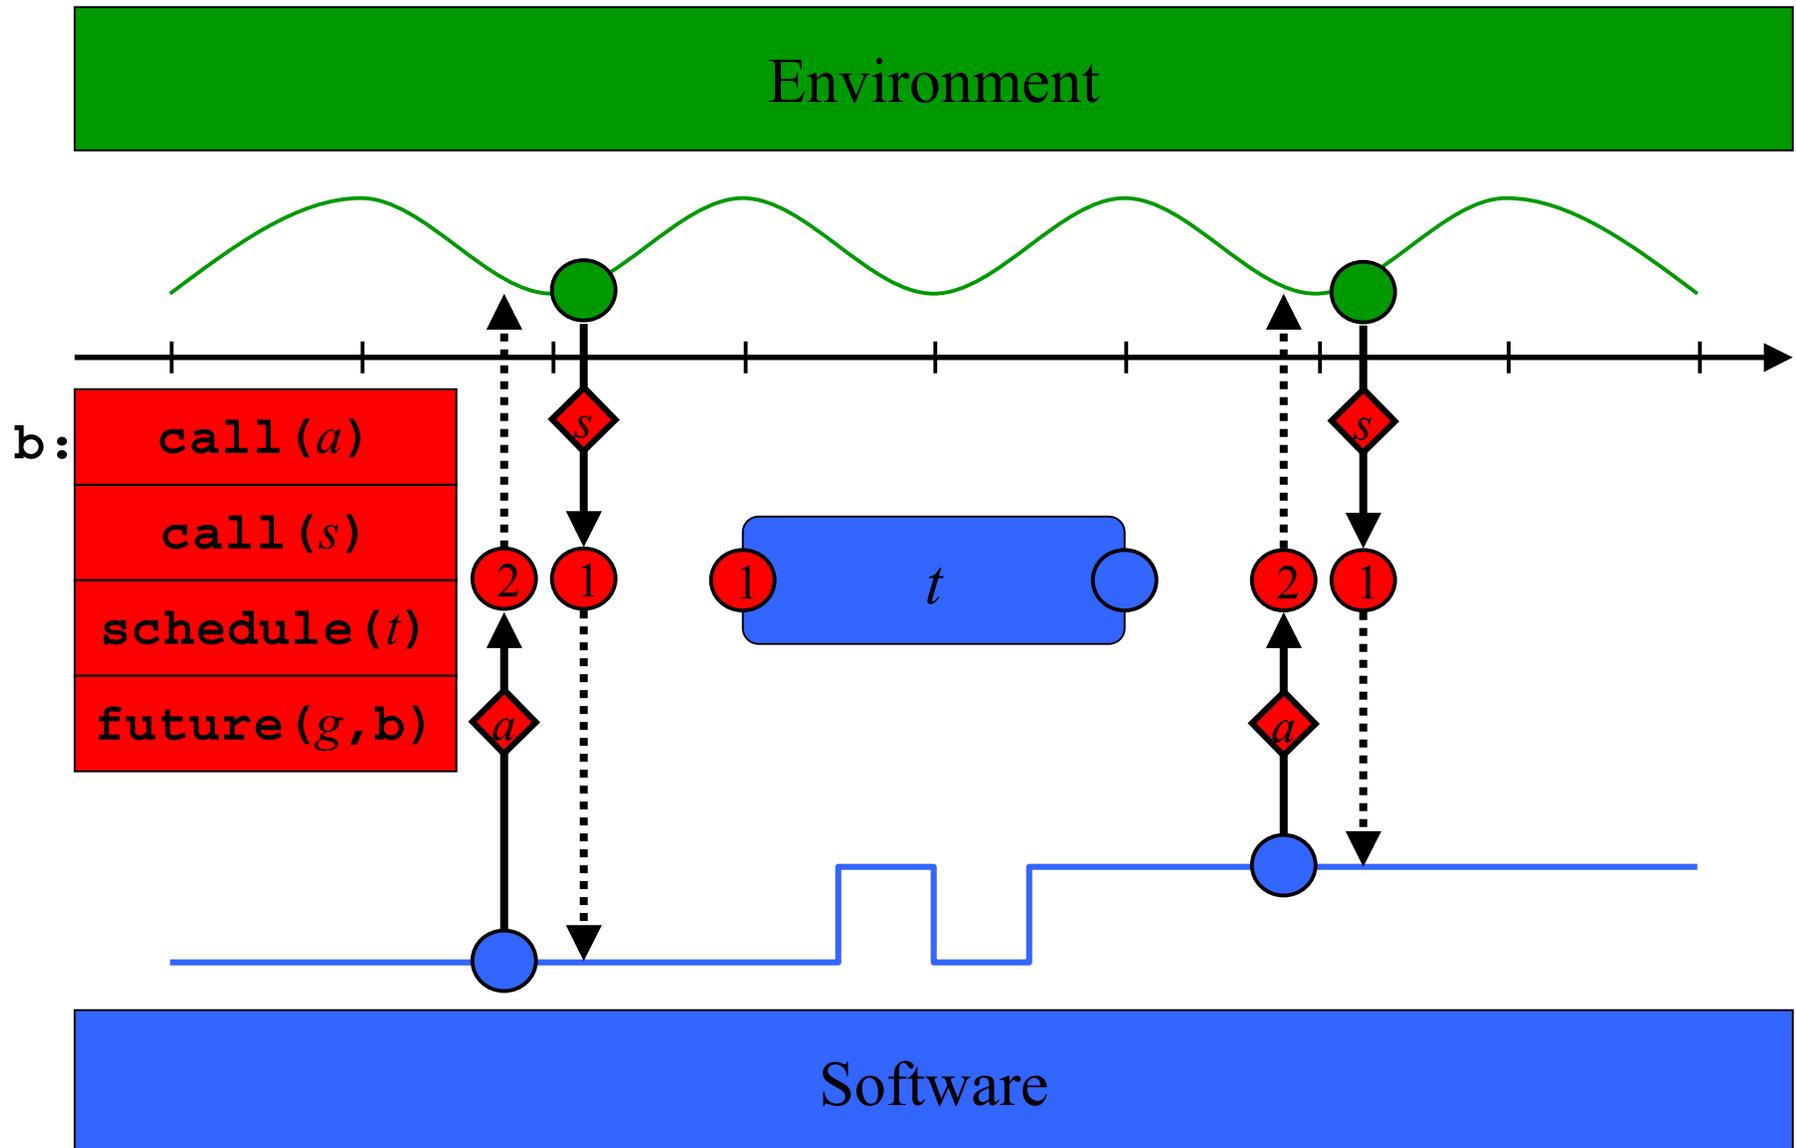

# A Trigger $g$

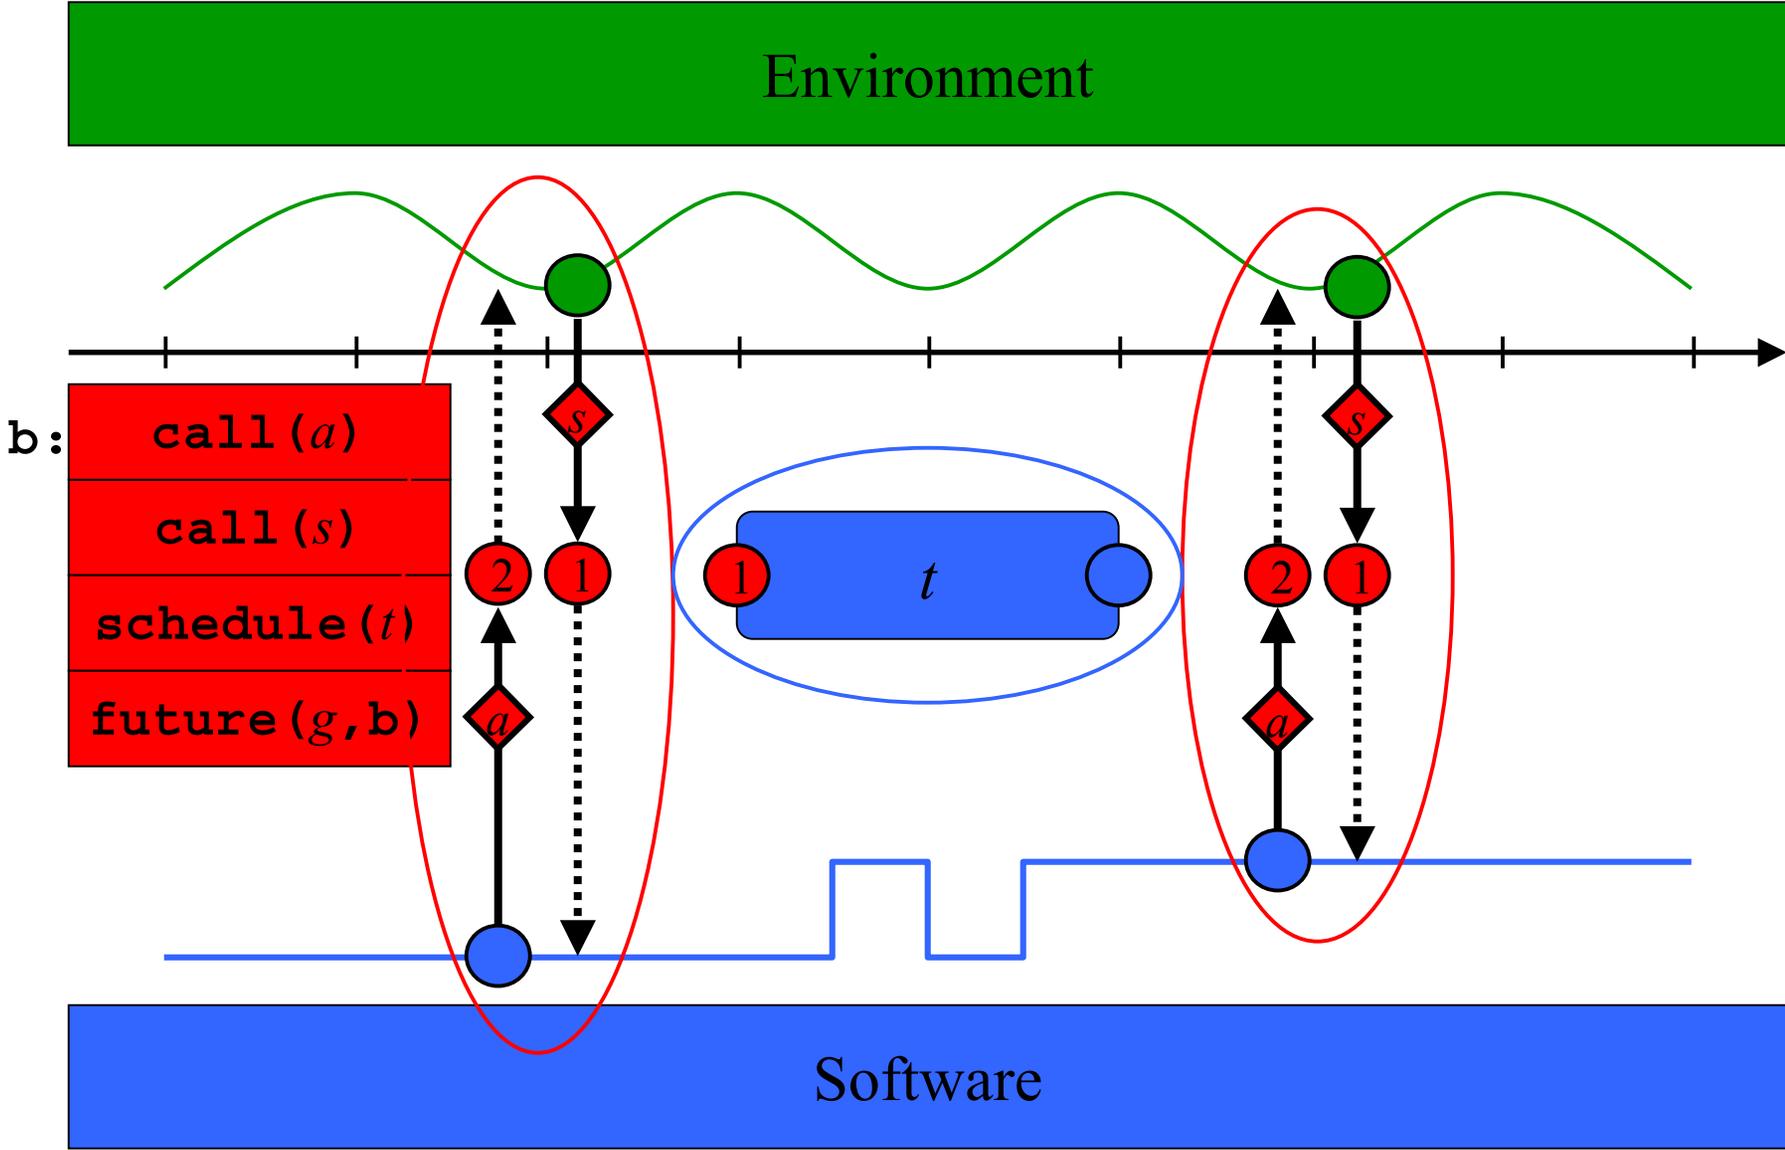

---

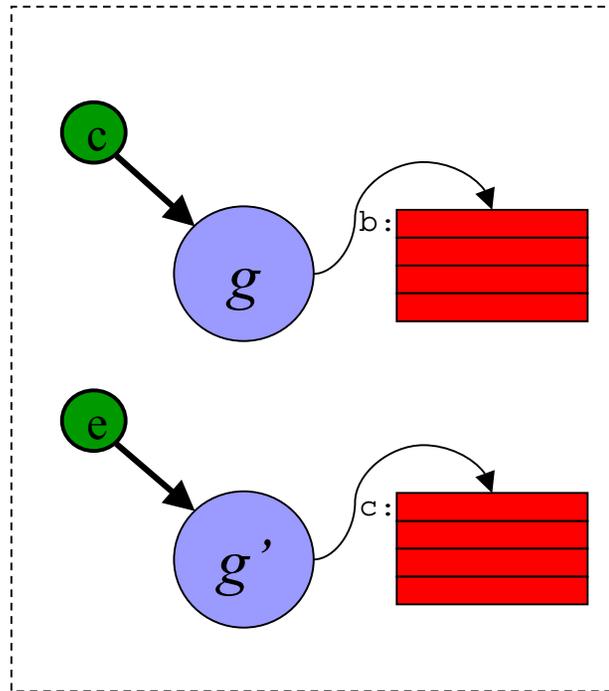

# An Embedded Machine Program

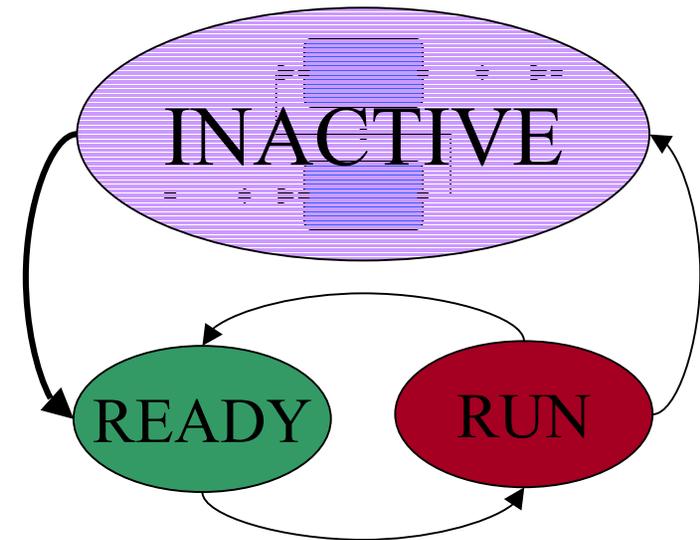

# Synchronous vs. Scheduled Computation

# Synchronous vs. Scheduled Computation

schedules

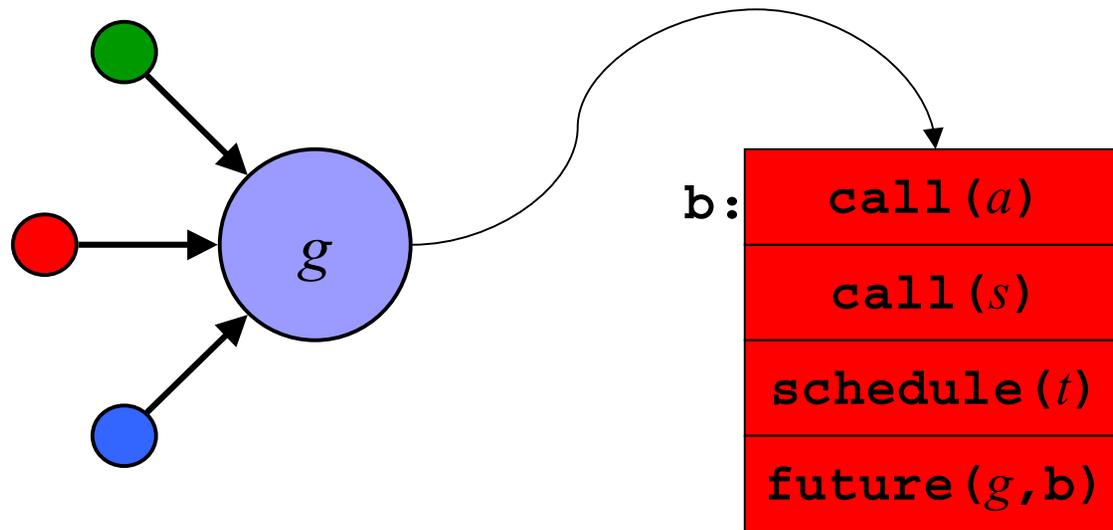

- Synchronous computation
- Kernel context
- Trigger related interrupts disabled

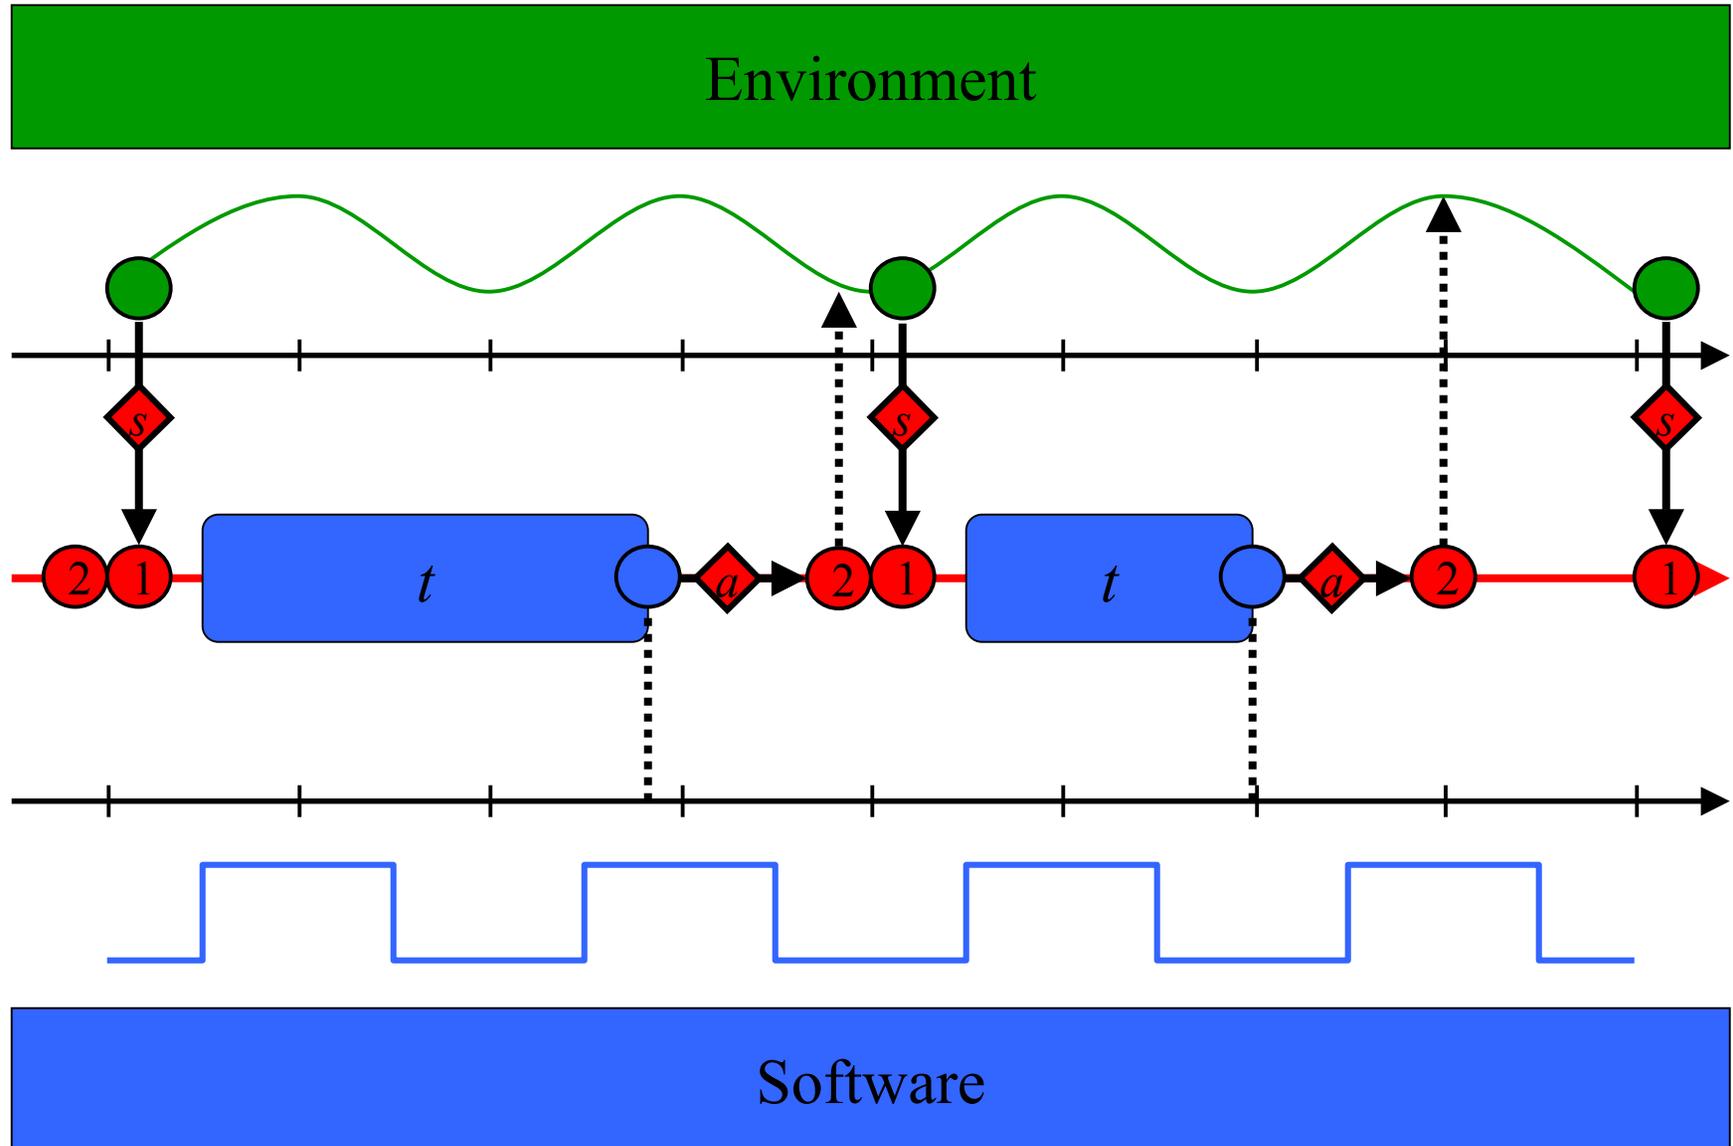

- Scheduled computation
- User context

# Trigger $g$ : Input-, Environment-Triggered

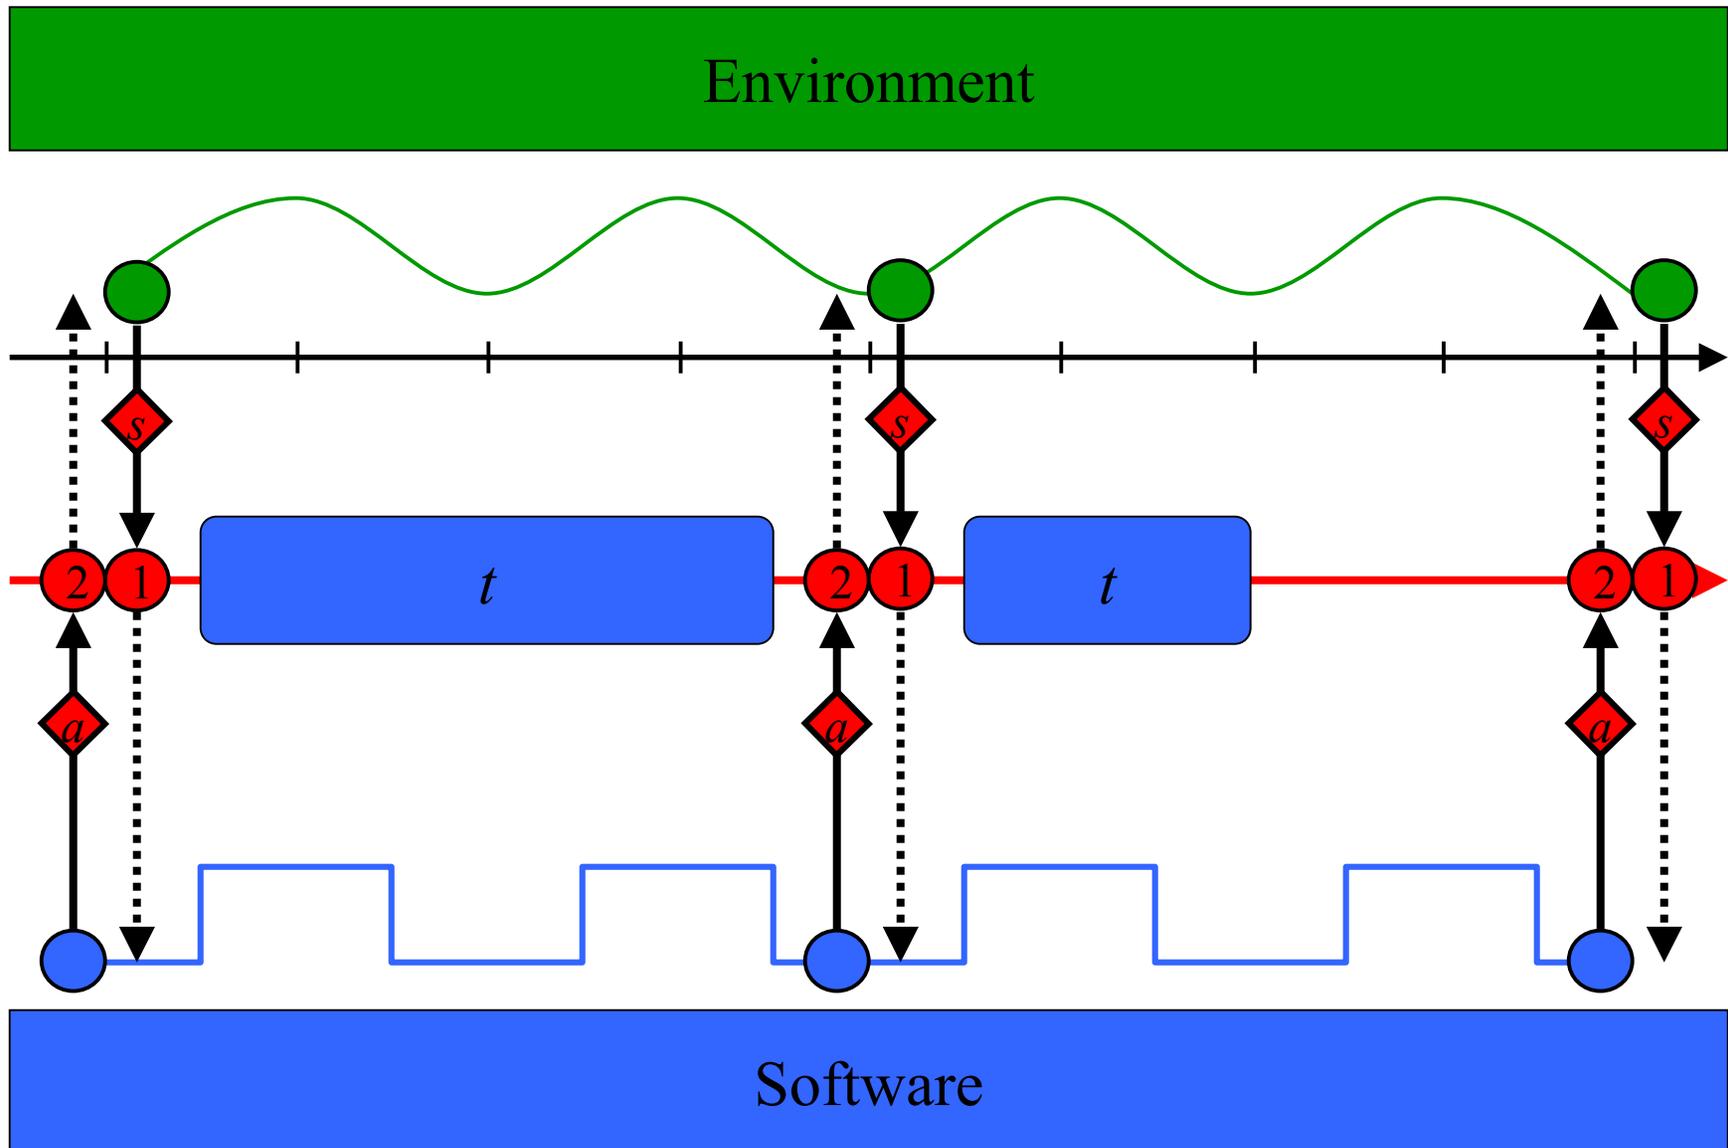

---

# Input-deterministic If Time Safe

# Environment-deterministic If Environment-triggered

Clock

# Giotto Syntax (Functionality)

---

```
sensor gps_type GPS uses c_gps_device ;  
actuator servo_type Servo := c_servo_init  
    uses c_servo_device ;
```

output

```
ctr_type CtrOutput := c_ctr_init ;  
nav_type NavOutput := c_nav_init ;
```

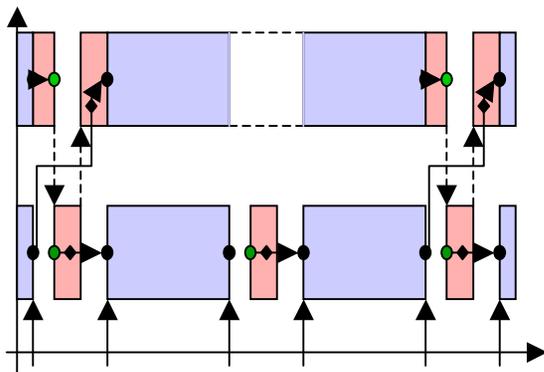

```
driver sensing (GPS) output (gps_type gps)  
{ c_gps_pre_processing ( GPS, gps ) }
```

```
task Navigation (gps_type gps) output (NavOutput)  
{ c_matlab_navigation_code ( gps, NavOutput ) }
```

...

# Giotto Syntax (Timing)

---

...

```
mode Flight ( ) period 10ms
```

```
{
```

```
actfreq 1 do Servo ( actuating ) ;
```

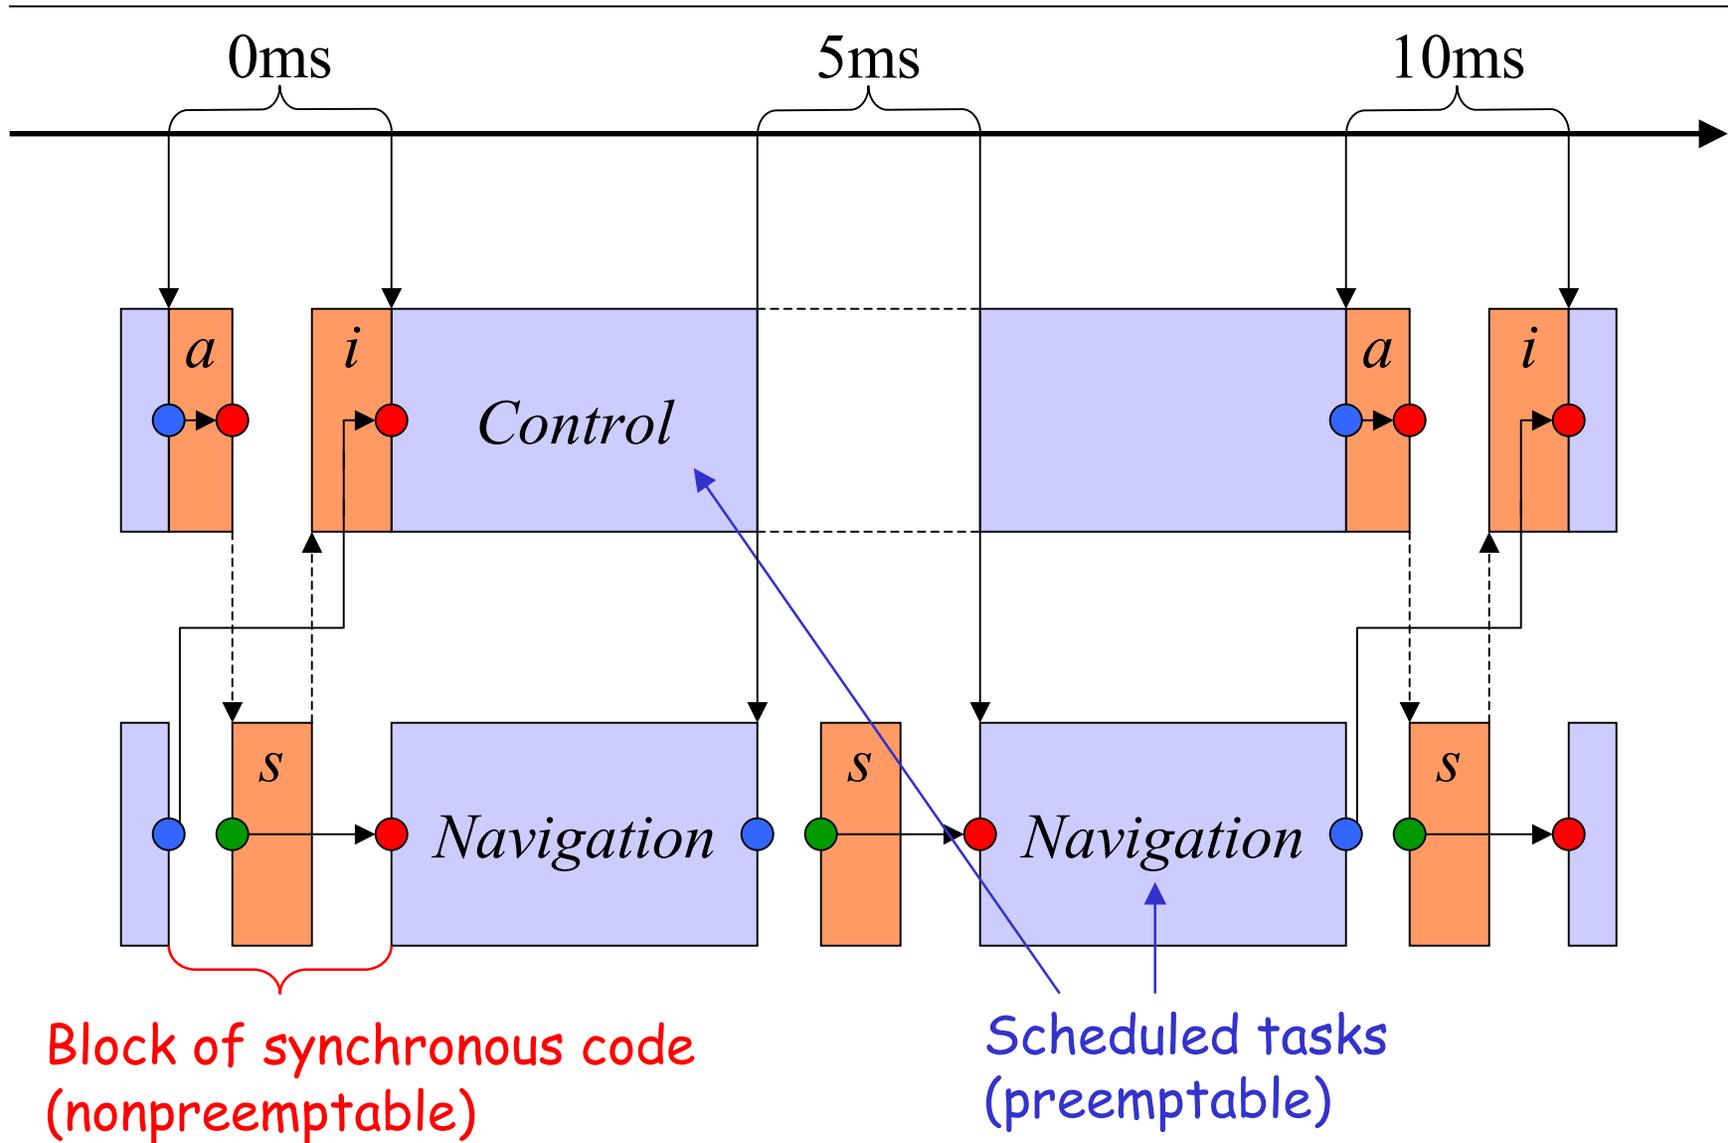

```
taskfreq 1 do Control ( input ) ;
```

```
taskfreq 2 do Navigation ( sensing ) ;
```

```
}
```

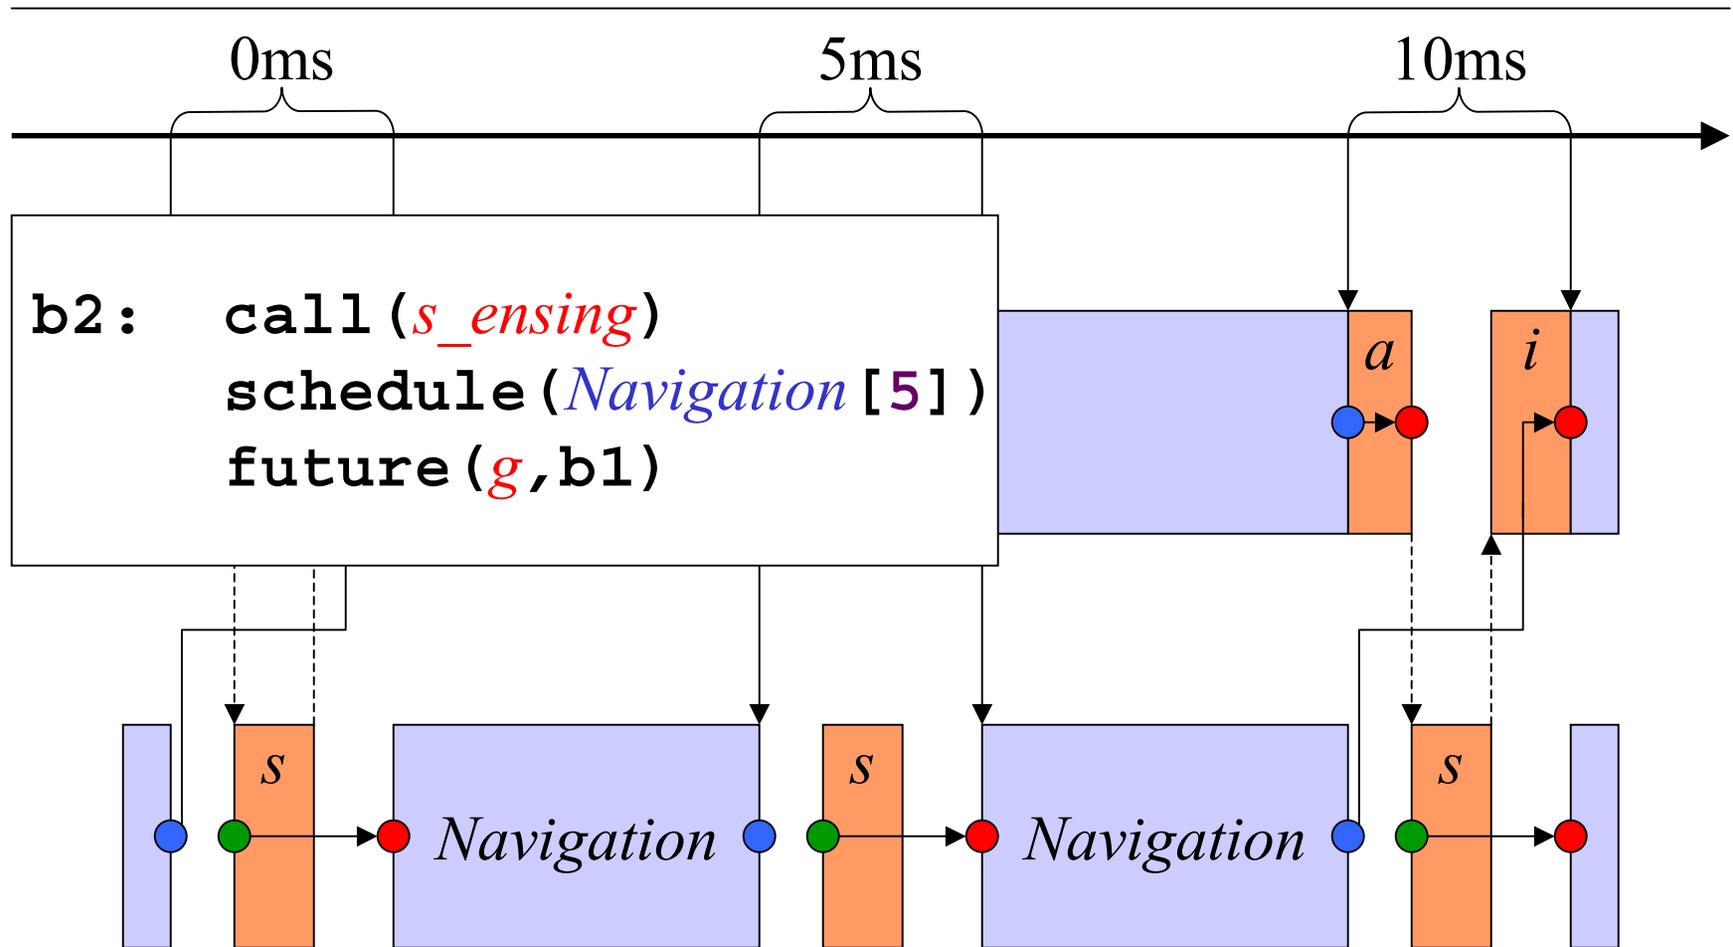

...

# Code Generation for HeliNav

```
b2:  call(s_ensing)  
     schedule(Navigation[2])  
     schedule(Connection[(7,10)])  
     future(g,b1)
```

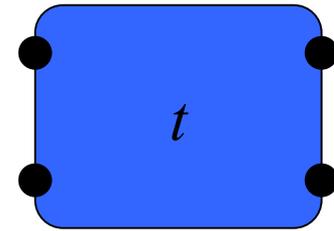

# Instructions

Synchronous  
Driver:

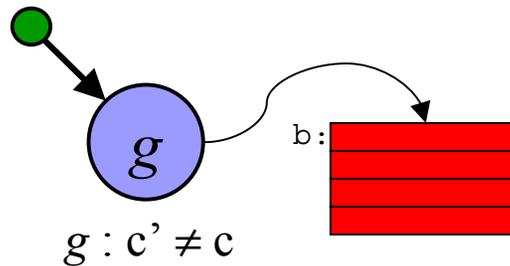

`call (d)`

Scheduled  
Task:

`schedule (t)`

Triggering:

`future (g, b)`
